Basic Manual

A5523T
by TOSHIBA

au by KDDI

Introduction

Thank you for purchasing the A5523T. Before using your A5523T, be sure to read the A5523T Basic Manual (this PDF manual) to ensure correct usage. After you have finished reading this manual, store this PDF manual and the printed manuals in safe places so you can retrieve them whenever you need them.

Printed Manuals for the A5523T (Japanese)

The A5523T comes with the Basic Manual and Instruction Manual.

●For learning the basics:

Read the A5523T Basic Manual (this manual).

●For learning details on using each function:
Read the supplied A5523T Instruction Manual.

The following manual is also available on the au homepage.

・ Keyword searchable au Online Manual

(http://www.au.kddi.com/manual/index.html)

You can also access the au Online Manual from EZweb.

<EZweb Access> ⇒ *EZweb* ⇒ 1 *Top Menu*
⇒ *auお客さまサポート* (au Customer Support)
⇒ *調べる* (Search)
⇒ *オンラインマニュアル* (Online Manual)

Note

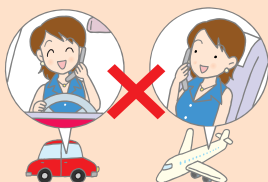
・The typeface and shape/color of fonts used for characters in the sample screens in this manual may differ from those used for characters in actual screens, or some characters may be omitted.

Cell Phone Etiquette

Etiquette for Cell Phone Use

■ The cell phone always emits weak radio waves when power is on.
■ Use the cell phone in an enjoyable and safe manner without forgetting to be considerate of others around you.

●The use of cell phones is not allowed in some places.

- Do not use the cell phone while you are driving. Doing so is both dangerous and prohibited by law.
- Using a cell phone in an aircraft is prohibited by law. Be sure to turn the cell phone off.


●Radio waves from cell phones may interfere with medical electrical equipment.

- Some people close to you in busy places such as crowded trains may be using a pace-maker. Turn the cell phone off in such places.
- Abide by the rules of hospitals and other medical institutions where it is forbidden to use or carry cell phones.

●Be considerate of where you use the cell phone and how loudly you talk.

- Do not make calls from cinemas, theaters, museums, libraries, and other similar places. Turn power off or turn on manner mode to prevent others around you from being inconvenienced by ring tones for incoming calls or mail.

Manner mode

- Do not use the cell phone in places where you will be in the way of others.
- Move to areas where you will not inconvenience others on trains or in hotel lobbies.
- Take care to avoid talking in a loud voice.

- Obtain the permission of other people before you take their photos with the cell phone's camera.

- Do not use the cell phone's camera for recording information in bookstores and other locations where taking photos is not permitted.

Cell Phone Basics

Cell Phone Features

Hello Messenger

Up to four members can exchange text, photos and sound in real time using au cell phones that support Hello Messenger.

Page 64

Mail

You can e-mail to other cell phones or to a PC.

Page 53

Camera

You can take photos and movie clips and then send them easily by e-mail.

Page 69

EZ•FM

You can listen to the FM radio.

Page 86

Limit Mode

You can limit incoming and outgoing calls and c-mail.

Page 90

Simple Mode

You can make operation even simpler by restricting use to only frequently used functions.

Page 97

EZ Navi

Provides useful positional information services including EZ Navi Walk and Safety Navi.

Page 82

EZweb

You can download Chaku-Uta® and access sites.

Page 75

Manner Mode and Voice Memo

Manner Mode

You can use manner mode to turn off the incoming call ring tone and other tones so as not to inconvenience other people.

When the standby screen is displayed, hold down [◀] for at least one second.
Page 33

Voice Memo

When you cannot answer calls, the cell phone can play an answering message (Japanese) and record memos.

When the standby screen is displayed, hold down [メモ/クリア] for at least one second.

Page 34

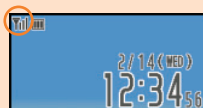
Checking the Power, Signal Strength, and Battery Level

Normally, you should leave the cell phone turned on

To make and receive calls, you need to turn on power.

Hold down [電源] for at least one second.

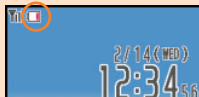
Page 16

If a signal is not being received, you cannot talk on the cell phone


Even in service areas, there are some places where it is difficult to receive a signal.

Yıll indicates the signal strength.

Page 16

Pay attention to the battery level


When the battery level is low, the cell phone may not function properly.

▯ indicates the battery level.

Page 16

Do not use the cell phone while driving!

Holding a cell phone, talking on a cell phone, looking at a cell phone display to send mail or perform some other operation while driving is against the law in Japan.
(Revised Traffic Control Law, effective November 1, 2004)

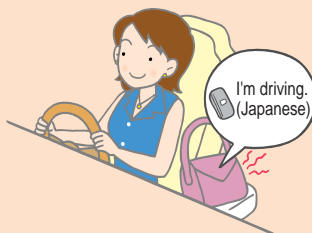
× Looking at mail on a cell phone display.

× Holding a cell phone in your hand for talking.

Turn off your cell phone or put it in Drive Mode while driving.

Drive Mode

In Drive Mode, a Japanese message meaning "I'm driving now, so I can't answer your call." is played when a call is received, telling the caller to leave a message on the voice memo.

When the standby screen is displayed, press [◄], use [✜] to select *Drive Mode*, and then press [●] (Select).


Spam and One-ring Calls

If you receive spam:

You can set the mail filters to reject only specific mail or mail indicated by **未承諾広告※** (Unsolicited Advertisement), which often tends to be spam.

The following mail filters are available for rejecting spam:

・未承諾広告フィルター
(Unsolicited Advertisement Filter)
・アドレスフィルター (Address Filters)
- 指定拒否設定
(for not receiving specific mail)
- 指定受信設定
(for receiving specific mail only)

Page
60

If you receive a call from an unknown phone number:

It may be an attempt to get you to return a call to a service with very high charges.

in the Incoming History indicates that there was a call which rang three seconds long or shorter.

About Disaster Message Board

When a big scale disaster occurs, you can register your safety information through EZweb. The registered safety information can be referred from anywhere in Japan through EZweb or Internet.

Registering the safety information

- When a big scale disaster occurs, from au phone, you can register your safety information such as your condition or comments to the 災害用伝言板 (Disaster Message Board) created on the EZweb.
- After the registration of your safety information, you can notify by e-mail your family or acquaintances you have previously designated that you registered your safety information on the 災害用伝言板 (Disaster Message Board).

Referring the safety information

- You can refer to the safety information of the person whom you want to know the information of by entering the phone number of the person from EZweb or Internet.*

* When you refer to the safety information from other carriers' cell phone, PHS or PC, you can refer to it from "http://dengon.ezweb.ne.jp/".

Access	
Access	EZ ⇒ *EZ Menu (EZweb Menu)* ⇒ 1 *Top Menu* ⇒ *災害用伝言板* (Disaster Message Board)
	http://dengon.ezweb.ne.jp/

- The maximum preservation period of the registered information is 72 hours.
- The maximum available number of each registration is 10. When the number of registration exceeds 10, old information will be overwritten in order of registration.
- The demonstration of this service can be referred to anytime by pressing [EZ] ⇒ ***EZ Menu (EZweb Menu)*** ⇒ [1] ***Top Menu*** ⇒ *auお客さまサポート* (au Customer Support) ⇒ *災害用伝言板（デモ版）* (Disaster Message Board (Demo Version)).
- To view the Disaster Message Board in English, select ***English*** on the top display of the Disaster Message Board.

Contents

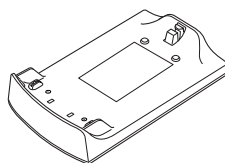
Getting Ready

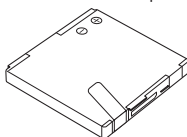
Checking the Contents of the Box

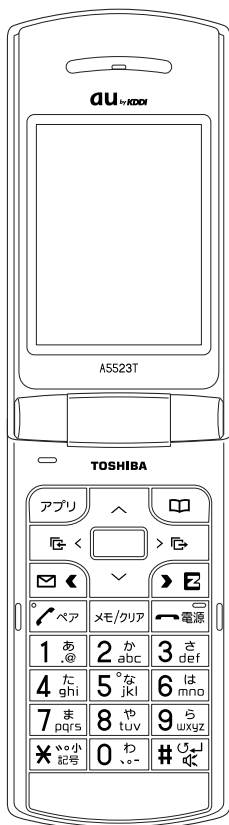
The box contains the cell phone and accessories.

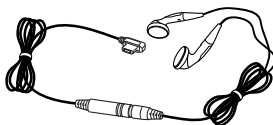
· Cell phone

· Battery pack
(Installed in the phone)

· Desktop holder






· Toshiba flat-type stereo earphone 04


· Basic Manual (Japanese)

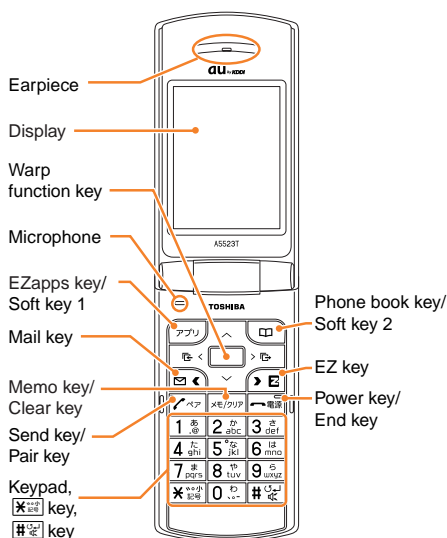
· Instruction Manual (Japanese)

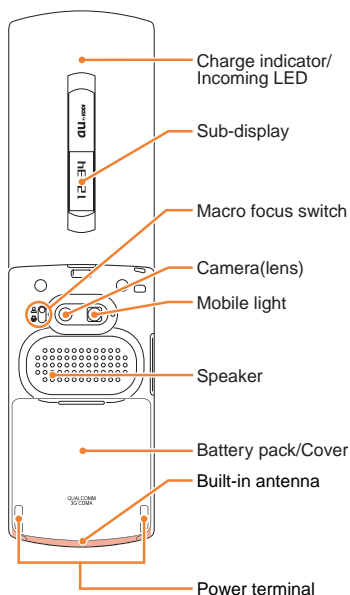
· Warranty (Japanese)
· Safety Precautions (Japanese)

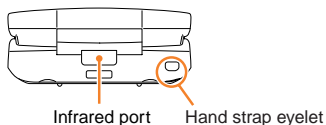
Note

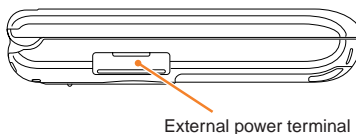
- An AC adapter and microSD™ memory card are not included. Purchase a common AC adapter 01 and a commercially available microSD™ memory card separately.

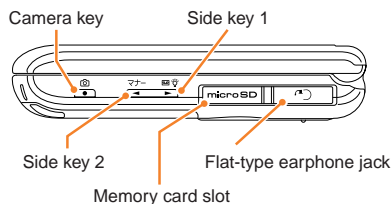
Names of Parts

From the Front


From the Back


From the Side






Security Code and Passwords

You can use the security code and passwords described below to restrict use of your A5523T.
Take care not to forget the security code and passwords, because they are required for performing various operations and using subscription services.

Security Code

Usage Examples	①Using the Answering Service (Voice Mail) and Call Transfer remotely from a regular phone. ②Making inquiries, applications, and changes while using au Customer Service Center voice guidance, au web pages, and EZweb. ③Changing various settings from *Mail Filter* or *Other Setup* of E-mail Setup.
Initial Setting	The four-digit number you wrote on your subscription form.

Lock No.

Usage Examples	Changing various settings of the cell phone, etc.
Initial Setting	1234 (four digits)

Limit Mode Password

Usage Examples	①Setting/canceling Limit Mode. ②Changing the Limit Mode settings.
Initial Setting	12345678 (eight digits)

EZ Password

Usage Examples	Concluding/canceling subscriptions for EZweb fee-based content.
Initial Setting	The four-digit number you wrote on your subscription form.

Premium EZ Password

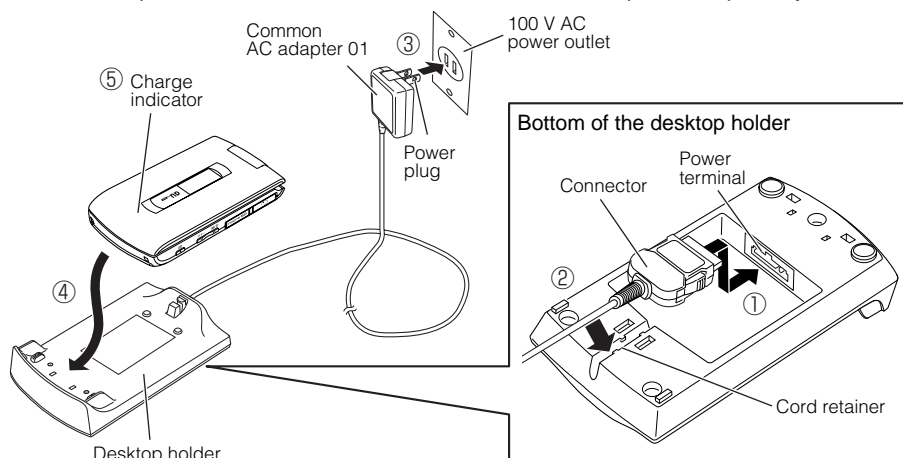
Usage Examples	①Concluding/canceling subscriptions for EZweb fee-based content paid by using *まとめてau支払い* (au Collective Payment Service). ②Purchasing products from EZweb sites that use *まとめてau支払い* (au Collective Payment Service).
Initial Setting	The four-digit number you wrote on your subscription form.

Navi Password

Usage Examples	Permission to request Auto Position Search registration from an au cell phone or launch Safety Navi.
Initial Setting	Set when Safety Navi is first launched (four digits).

Charging the Battery Pack

The battery pack is not fully charged at the time of purchase.
Be sure to charge the battery pack before using the cell phone for the first time.

・An AC adapter is not included. Purchase a common AC adapter 01 separately.


1 Connect the common AC adapter 01 to the desktop holder.

・Check the shape of the connector for the common AC adapter 01 and then plug it into the power terminal on the bottom of the desktop holder.

2 Fit the common AC adapter 01 cord into the cord retainer.

3 Turn the common AC adapter 01's power plug 90 degrees and connect it to a 100 V AC power outlet.

4 While the A5523T is closed with the battery pack attached, insert it into the desktop holder as shown in the figure.

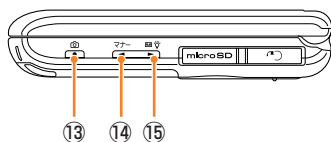
5 Confirm that the charge indicator lights.

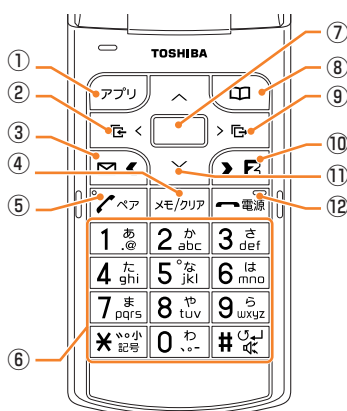
・Charging: The charge indicator lights.
・Charging finished: The charge indicator goes out.

If you charge the A5523T battery pack while the phone is turned on, it beeps when charging starts or ends.

Note

・Hold the desktop holder while removing the A5523T.
・You can also charge the battery pack by connecting the common AC adapter 01 directly to the A5523T.

Key Assignments


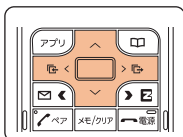


① [アプリ] : EZapps startup
② : Display Incoming History
③ : E-mail
④ [メモ/クリア] : Voice memo setting/cancel; character delete; operation cancel
⑤ [ペア] : Make and answer calls; use the Pair function
⑥ [0] ～ [9], [*], [#] : Phone number and character input
⑦ : Display Launcher menu
⑧ : Phone Book
⑨ : Display Outgoing History
⑩ : Display EZ menu
⑪ : Display Desktop menu
⑫ [電源] : Power on/off; end call/communication; cancel operation
⑬ : Camera
⑭ : Manner mode
⑮ : Mobile light on/off

Note

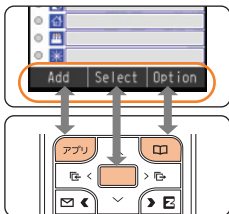
- To lock the side keys to prevent unintentional side key (, , and) operations while your phone is closed, hold down for at least one second when the standby screen is displayed. To unlock the side keys, hold down for at least one second .
- If you press [ペア] for at least one second when is displayed on the standby screen, your cell phone searches for a base station with a good signal.
- You can sound the Safety Buzzer by holding down [#] for at least one second when the standby screen is displayed.
  See page 108 for information on the Safety Buzzer setting.

Warp Function Key

Use the up, down, left, and right parts of the key to select items and to move the cursor. Press the center of the key to confirm a selected item.


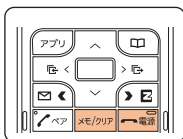
(up/down) / (left/right)	Selects items, and moves the cursor up, down, left and right.
(center)	Confirms the selected item or starts the selected operation.

Soft Keys

When indications such as the following are displayed at the bottom of the display, you can press the corresponding soft keys to perform the indicated operations. The soft key indications vary depending on the screen.


Soft key 1 アプリ	Performs the operation indicated at the bottom left of the screen.
Center key	Performs the operation indicated at the bottom center of the screen.
Soft key 2	Performs the operation indicated at the bottom right of the screen.

If you lose track of where you are or if you make a mistake...

Perform one of the following operations when you lose track of where you are or if you make a mistake while operating the cell phone.


メモ/クリア	Returns to the previous screen.
電源	Returns to the standby screen.

Turning On Power

1 Hold down 電源 for at least one second.

Standby screen

Check the signal strength.

Strong	Medium	Weak	Very weak	Out of range

・You cannot receive or make calls if [Out of range icon] is displayed.

Check the battery level.

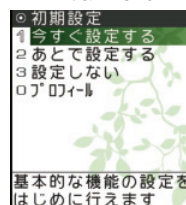
Full	Low	Very low (requires charging)	Empty	Charging

Turning Off Power

Hold down 電源 for at least one second.

Configuring Initial Settings

1 When the standby screen is displayed, press [center key].

Initial menu


2 Press [3] ***設定しない*** (Do Not Setup).

- If you select ***設定しない*** (Do Not Setup), the initial settings are as shown below.

Lock No.	1234	EZweb	Medium-small
Telephone	Medium	Character Input	Medium
E-mail	Medium-small	Notify Call ID	ON
C-mail	Medium-small	Incoming Call	Pattern 1

Note

- Even if you do not configure the initial settings, you can still make and answer calls.
- The initial settings include changing the Lock No., setting the character size, setting the Notify Call ID, and setting the call ring tone.
- You need to configure initial settings before using the cell phone for the first time only. Furthermore, you can also change each of the initial settings later.
- After configuring initial settings, you can switch the display language to English (see page 18).

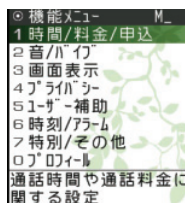
For Simple Mode Users

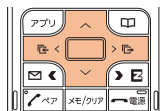
For details on Simple Mode (mode to make operation even simpler by restricting use to only frequently used functions), see "Simple Mode" on page 97.

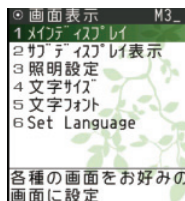
Switching the Display Language to English

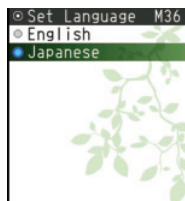
You can switch the display language for function names and other items to English.

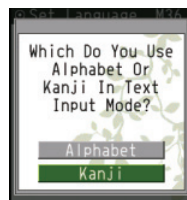
1 When the standby screen is displayed, press [center key].

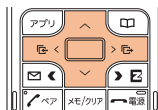
2 Use [navigation key] to select ***機能*** (Function) and then press [center key] (**選択** [Select]).


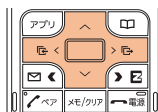


3 Press [3] ***画面表示*** (Screen Setup).


4 Press [6] *Set Language*.


5 **Use [up/down key] to select *English* and then press [center key] (Select).**




6 **Use [up/down key] to select *Alphabet* and then press [center key] (Select).**


Viewing the Display

Display indicators keep you informed when new e-mail arrives, about the status of function settings, etc.

Display

Indicator		Description
①		Indicates signal strength.

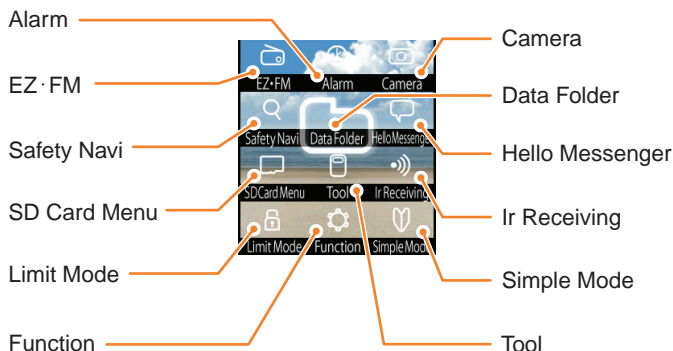
④		Indicates the side keys are locked.
⑤		Indicates battery level.
⑥	—	Indicates the current date and time.

Note

- The date and time are set automatically.
- The layout and content of screens in this manual are only for the purpose of explanation and contain some indicators that cannot appear at the same time.
- The standby screens shown in this manual have the default *Hamabe* wallpaper setting specified.

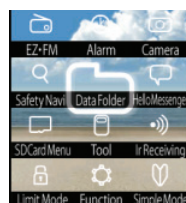
Using Menus

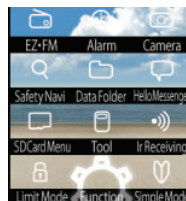
Launcher Menu

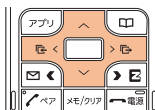
The Launcher menu provides you with access to various A5523T functions.
The Launcher menu contains the following items.


1 **When the standby screen is displayed, press [center key].**

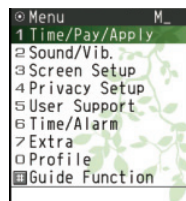
Launcher menu

2 **Use [navigation key] to select an item.**


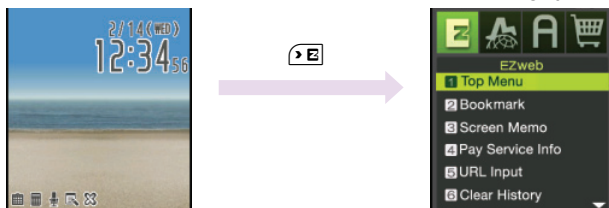




3 **Press [center key] (Select).**

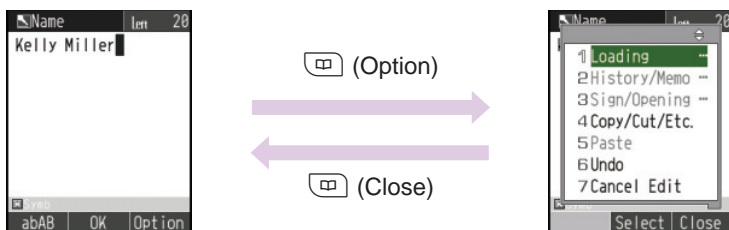
➡The item selected in the Launcher menu appears.


Using EZ Menu

The EZ menu provides a quick and easy way to access the EZweb functions.
When the standby screen is displayed, press [EZ key] to display the EZ menu. Use [left/right key] to select a menu, use [up/down key] to select an item and then press [center key] (Select) to access a function.


You can access the following functions from the EZ menu.

Option Menus

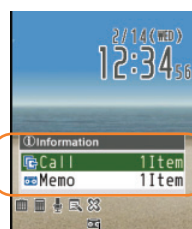
An Option menu for performing various related operations will open if you press when Option is displayed in a screen for configuring function settings, entering characters, or performing other operations.


About Displaying Alert Window

Alert window

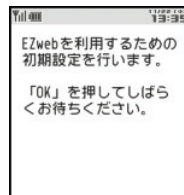
Alerts are displayed in situations such as when you receive mail or you were unable to take a call.

If the alert window is displayed on the standby screen, you can temporarily hide the alert window and display the Launcher menu by pressing and then .

To redisplay the temporarily hidden alert window, press again when the standby screen is displayed.


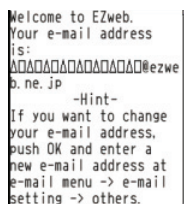
Initializing E-mail and EZweb

To use e-mail and EZweb, you need to apply for an EZweb subscription. If you did not apply for an EZweb subscription at the time of purchase, contact an au shop or the au Customer Service Center.
Also, before use, be sure to configure initial settings. Your e-mail address is assigned automatically when you initialize e-mail and EZweb.

1 **When the standby screen is displayed, press [✉].**


2 **Press [●] (OK).**

➡After a short while, the screen shown to the right will appear. This indicates that the setup is complete.

Welcome to EZweb.
Your e-mail address is:
□□□□□□□□□□□□□□□□@ezweb.ne.jp
-Hint-
If you want to change your e-mail address, push OK and enter a new e-mail address at e-mail menu -> e-mail setting -> others.


3 **Press [●] (OK).**

➡The initial settings are complete.

Note

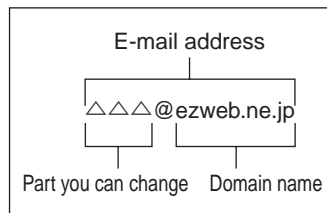
・You can also configure initial settings by pressing [EZ] or [アプリ].

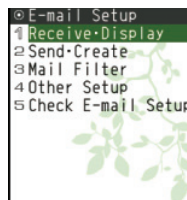
Checking Your Phone Number and E-mail Address

1 **When the standby screen is displayed, press [●] and then press [0].**

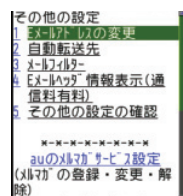
Changing Your E-mail Address

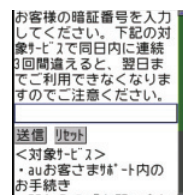
Getting Ready

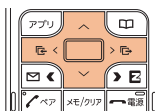
You can change the account name part of the e-mail address as indicated to the right.


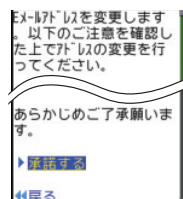
1 **When the standby screen is displayed, press [✉] and then press [6] *E-mail Setup*.**


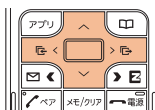
2 **Press [4] *Other Setup*.**

➡The cell phone connects to the server.


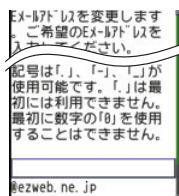
3 **Use [✣] to select *Eメールアドレスの変更* (Change E-mail Address) and then press [●] (Select).**


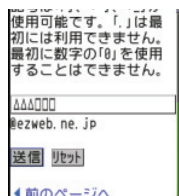


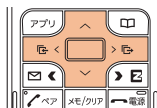
4 **Enter your security code, press [●] (OK), use [✣] to select *送信* (Send), and then press [●] (Select).**




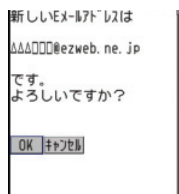
- Your security code is the four-digit number you wrote on your subscription form.
- Any time the wrong security code is entered three times during a single day, the e-mail address change operation will be disabled until the following day.

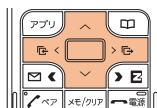
5 **Use [key] to select *承諾する* (Accept) and then press [key] (Select).**


6 **Use [key] to select the entry box, press [key] (Edit), enter an e-mail address using single-byte alphanumeric characters, and then press [key] (OK).**


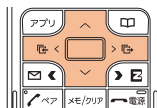


・For details on entering e-mail addresses, see page 42.

7 **Use [key] to select *送信* (Send) and then press [key] (Select).**




8 **Use [key] to select *OK* and then press [key] (Select).**

・Check that the e-mail address has been updated and then press [key] (OK).


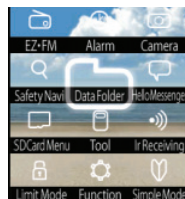
Note

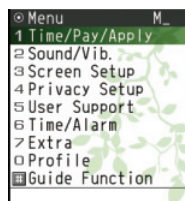
・Your e-mail address will not be changed if the address you enter above is already being used. If this happens, enter a different e-mail address.

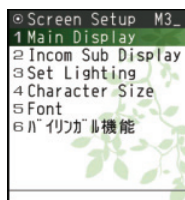
Using Extra Large Characters

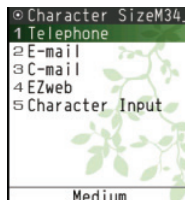
This feature displays text using oversize (extra large) characters in screens such as the Call screen, phone book list, E-mail and C-mail checking screen and the EZweb screen.

Example: Switching the character size in *Telephone* to *Extra Large*

1 **When the standby screen is displayed, press [center key].**


2 **Use [navigation key] to select *Function* and then press [center key] (Select).**


3 **Press [3] *Screen Setup*.**


4 **Press [4] *Character Size*.**


5 **Press [1] *Telephone*, use [navigation key] to select *Extra Large*, and then press [center key] (Select).**

- To switch to extra large characters for e-mail, c-mail or EZweb, press [2] *E-mail*, [3] *C-mail* or [4] *EZweb* instead of [1] *Telephone*.

Making and Answering Calls

Making a Call

1 **When the standby screen is displayed, use [0] to [9] to enter the phone number you want to call.**

- When calling to a regular phone, you also need to enter the area code.

2 **Press [✓].**

- If the phone number and name of the person you are calling are in the phone book, the name is also displayed.
- When you have finished the call, press [電源].

Note

- After you enter a phone number, you can add 184 or 186 to the phone number if you press [📖] (Option), press [2] *Add/Off SP No*···, and then press [1] *184* or [2] *186*.
  [1] *184* : When you do not want to inform the other party of your phone number.
  [2] *186* : When you want to inform the other party of your phone number.

Making an International Call

au International Call Service

Available without any additional application

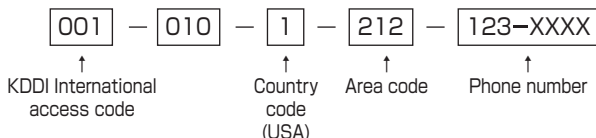
Example : To call 212-123-△△△△ in the USA

- Calling charges for this service are added to monthly mobile phone calling charges and billed together.
- Check the Country code at the au Customer Center.
- For charges, refer to au MOBILE PHONE SERVICE GUIDE or au Customer Center.

001 KOKUSAI MOBILE TALK

Application required.
For inquiries, contact the KDDI Customer Service Center.

0077-7160
(toll-free; open 9:00 to 20:00 on everyday including weekends and national holiday)

001	—	010	—	1	—	212	—	123–XXXX
↑ KDDI International access code				↑ Country code (USA)		↑ Area code		↑ Phone number


- Charges for 001KOKUSAI MOBILE TALK are charged separately from monthly au telephone charges.
- Check the Country code at the au Customer Center.
- For charges, refer to au MOBILE PHONE SERVICE GUIDE or au Customer Center.

Answering a Call

To answer a call, press [ペア].

- When you have finished the call, press [電源].

Display When a Call is Received

The phone number of the caller appears.
If the caller's phone number and name are in your phone book, the name is also displayed.
When the phone number of the caller is not displayed, one of the following indicators may appear.

Indicator	Meaning
ID Unsent Setup	The caller did not send a Caller ID.
Pay Phone	The call is from a pay phone.
Not Support	The call is from a phone that does not support Caller ID.

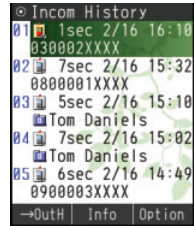
Missed Call Notification

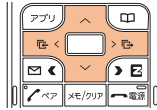
If you did not answer a call, and *Call* are displayed to let you know that you missed a call.
To check the caller's phone number, use to select *Call* and then press . You can then return the call (see page 31).

Redialing (Outgoing History/Incoming History)

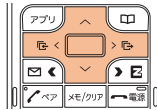
Example: Returning a call to a phone number in the incoming history

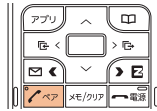
1 When the standby screen is displayed, press [key].

- Pressing [key] while the standby screen is displayed displays the Outgoing History screen.
- The phone numbers are displayed in order of the most recent to the oldest.




2 Use [key] to select the phone number you want to call and then press [key] (Info).

- If you press [アプリ] (→OutH), the Outgoing History screen will be displayed.


3 Press [ペア].


Note

- The cell phone can store up to 50 phone numbers in each of the incoming history and outgoing history in order of the most to least recent.

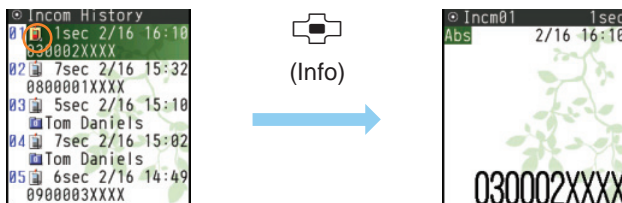
One-ring Calls

What is a One-ring Call?

A one-ring call is a call from an unknown caller that only rings once, causing it to be stored in the incoming history. One-ring calls are often used to get the receiver to return the call, which will connect you to a dating service or some other service that charges caller at high rates.

One-ring Indicator

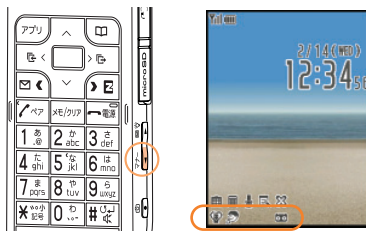
(one-ring call icon) indicator on the display indicates you have received a one-ring call (a call rang for three seconds or shorter) and the call is marked with Abs on the Incoming History screen. Be careful when you return a call to an unknown caller.

Making and Answering Calls


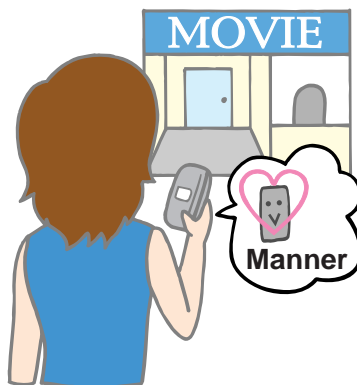
Turning On Manner Mode

The cell phone informs you of an incoming call or message by vibrating.

1 When the standby screen is displayed, hold down ◄ for at least one second.

➡This turns on manner mode, and displays and on the standby screen. This also turns on voice memo, which is indicated by on the standby screen.


Turning Off Manner Mode

When the standby screen is displayed, hold down ◄ for at least one second.
➡Turning off manner mode causes and to disappear from the standby screen. Voice memo is also turned off, which is indicated by disappearing from the standby screen.


Note

- Even in manner mode, the cell phone will still emit the shutter sound when you take a photo and the start and stop tones for movie recording.

Turning On Voice Memo

1 **When the standby screen is displayed, hold down [メモ/クリア] for at least one second.**

➡The answering message (Japanese) is played, then voice memo is turned on, which is indicated by [icon] on the standby screen.

Turning Off Voice Memo

When the standby screen is displayed, hold down [メモ/クリア] for at least one second.

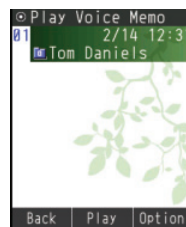
➡Voice memo is turned off and [icon] disappears from the standby screen.

Note

- The cell phone can record a maximum of three messages, each up to thirty seconds long.
- The cell phone can record up to a total of three voice memos including call voice memos. A call voice memo is for recording the voice of the other party during a call.
- Voice memo is a function that automatically answers calls and allows callers to record messages. Use the answering service when your phone is turned off or when you are in a location where a signal cannot be received.

Playing a Voice Memo

If a voice memo is recorded
➡ *Memo* and the number of memos appear on the standby screen.

1 Use to select *Memo* and then press .


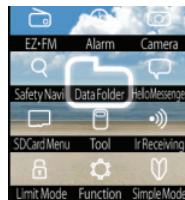
2 Use to select the voice memo you want to play and then press (Play).

- To stop playing the voice memo, press (Stop).

Deleting a Voice Memo

On the Play Voice Memo list, use to select the voice memo you want to delete.

➡Press (Option) and then press 1 *Delete*.
➡Use to select *Delete One* and then press (Select).
➡Use to select *Yes* and then press (OK).
Changing the Incoming Ring Tone

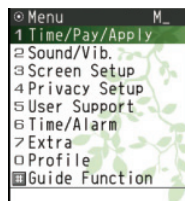
1 When the standby screen is displayed, press [center key].


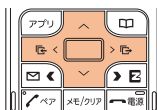
2 Use [directional key] to select *Function* and then press [center key] (Select).

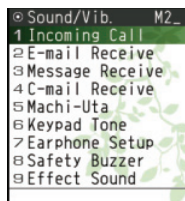
3 Press [2] *Sound/Vib.*.

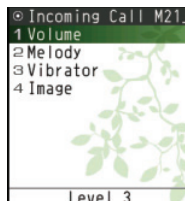
4 Press [1] *Incoming Call*.

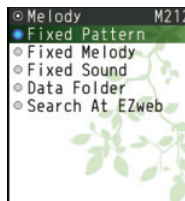
5 Press [2] *Melody*.

6


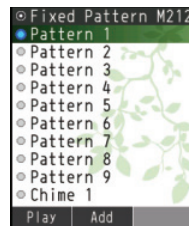


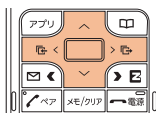






Use [key] to select *Fixed Pattern* and then press [key] (Select).

7




Use [key] to select *Pattern 3* and then press [アプリ] (Play).

・If you press [アプリ] (Back) or [メモ/クリア], the tone stops playing and you can select another tone.

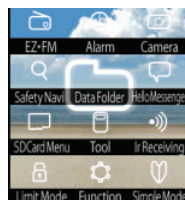
8

Press [key] (OK).

➡The incoming ring tone is set.

Note

・You can select from among fixed patterns, fixed melodies, fixed sounds, data folder contents, and EZweb search for your ring tone.
・The initial default setting is the *Pattern 1* fixed pattern.

Adjusting the Incoming Ring Tone Volume


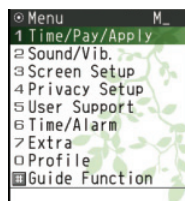
1 When the standby screen is displayed, press [center key].

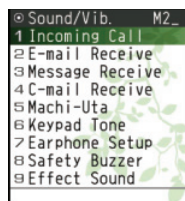
2 Use [navigation key] to select *Function* and then press [center key] (Select).

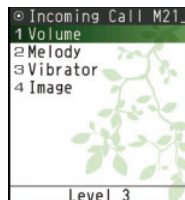
3 Press [2] *Sound/Vib.*.

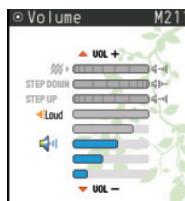
4 Press [1] *Incoming Call*.

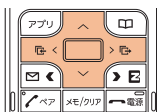
5 Press [1] *Volume*.

Making and Answering Calls








Use [key] to adjust the volume and then press [key] (OK).


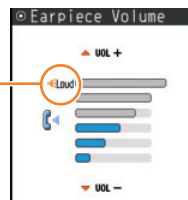
- Each press of [key] changes the volume one step.

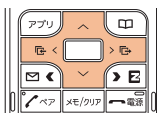
[vibration icon]	After a vibration alert, the ring tone sounds while gradually increasing in volume.
STEP DOWN	The ring tone sounds while gradually decreasing in volume.
STEP UP	The ring tone sounds while gradually increasing in volume.
Loud ↑ Standard ↓ Minimum	The ring tone sounds at the set volume.
(Silent)	The incoming ring tone does not sound.

- Keep on pressing [key] to set Silent ( ).

Adjusting the Earpiece Volume during a Call

1 During a call, press [key].

[key]: Increases the volume.
[key]: Decreases the volume.




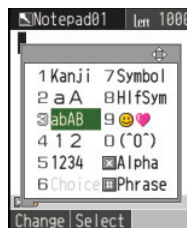
Turning on Loud (Loud volume) will increase the volume of the earpiece output to make it easier to hear.

2 Press [key] (OK).

Character Input

Character Entry Modes

When a character entry screen is displayed, you can select the character entry mode if you press (アプリ).
Menu Items

Kanji : Kanji conversion mode
ａＡ : Double-byte alphanumeric mode
abAB : Single-byte alphanumeric mode
１２ : Double-byte number mode
1234 : Single-byte number mode
Kana : Single-byte kana mode


Use (navigation key) to select a character entry mode and then press (center key) (Select).

Entering Single-byte Alphanumeric Characters

You can use the keys 1 to 0 to enter characters. More than one character is assigned to each key.
For example, each press of 2 changes the displayed character to the next character assigned to the key in the order of a ⇒ b ⇒ c ⇒ A ⇒ B ⇒ C ⇒ 2.
The following table shows the key assignment for entering characters.

	Number of Times to Press the Key											
Key	1	2	3	4	5	6	7	8	9	10	11	12
1	.	@	—	_	/	:	~	?	,	'	!	1
2	a	b	c	A	B	C	2					
3	d	e	f	D	E	F	3					
4	g	h	i	G	H	I	4					
5	j	k	l	J	K	L	5					
6	m	n	o	M	N	O	6					
7	p	q	r	s	P	Q	R	S	7			
8	t	u	v	T	U	V	8					
9	w	x	y	z	W	X	Y	Z	9			
0	0											
*	Single-byte symbols (switches an unconfirmed character between uppercase and lowercase)											
#	Adds a line break and displays characters in the opposite order											

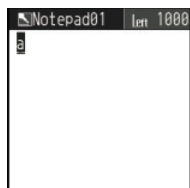
When you change your e-mail address, you cannot use the characters in (pink cells) for the account name (part of the address to the left of @).

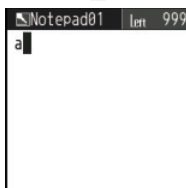
Note

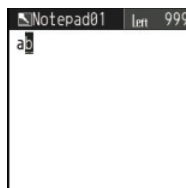
- Before you enter single-byte alphanumeric characters, switch to the single-byte alphanumeric mode.

Entering Two or More Characters Assigned to the Same Key

After you enter the first character, press [navigation key] to move the cursor (■) to the right and then enter the next character.

Example: Entering "ab"






Deleting Characters

To delete one character at a time, move the cursor to the character you want to delete and then press メモ/クリア. To delete all characters to the right of the cursor, hold down メモ/クリア for at least one second. If there are no characters to the right of the cursor, holding down メモ/クリア will delete all the characters.

Starting a New Line

Press #.

Note

• Certain functions such as c-mail do not support entering new lines.

Entering E-mail Addresses

E-mail Address Compatible Characters
- Before you enter an e-mail address, switch to the single-byte alphanumeric mode.
- When changing your e-mail address, you can enter up to 30 single-byte alphanumeric and symbol characters for the account name (part to the left of @). Note the following:
  - Uppercase characters cannot be used.
  - Period (.) or zero (0) cannot be used as the first character.

How to Enter E-mail Addresses

Use 1 to 0 to enter characters and numbers.

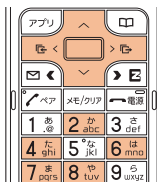
Example: Entering "taro.23@toshiba.co.jp" for the recipient's e-mail address

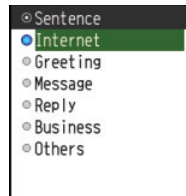
1 Enter "taro.23".

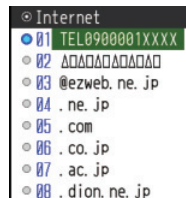
t : Press 8 once.
a : Press 2 once.
r : Press 7 three times.
o : Press 6 three times.
. : Press 1 once.
2 : Press 2 and then press # once.
3 : Press 3 and then press # once.
2 Enter "@".

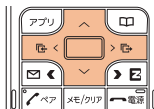
@: Press 1 twice.

3 Enter "toshiba" and then press (OK).

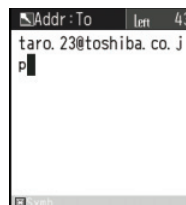
t : Press 8 once.
o : Press 6 three times.
s : Press 7 four times.
h : Press 4 twice and then press .
i : Press 4 three times.
b : Press 2 twice and then press .
a : Press 2 once.


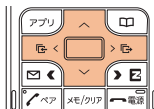
4 **Press [アプリ] (abAB) and then press [#] *Phrase*.**


5 **Use [navigation key] to select *Internet* and then press [center key] (Select).**




6 **Use [navigation key] to select *.co.jp* and then press [center key] (Select).**

➡".co.jp" is entered.


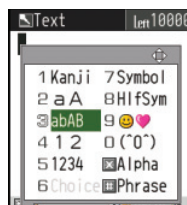


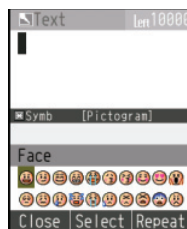
Note

- To enter ".co.jp" etc., you can use the Sentence menu.

Entering Pictograms
1 When a character entry screen is displayed, press [アプリ] (abAB).

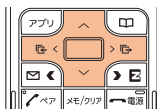
- You can also enter symbols, emoticons, and useful sentences (fixed text) from the character entry mode menu.

2 Press [9 ら wxyz] .


- You can switch the Pictogram screen by category, such as Face, if you press [✉ ‹] or [› E].


3 Use [◎] to select the pictogram you want to enter and then press [●] (Select).

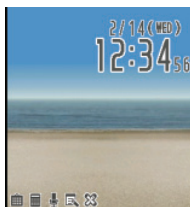
➡This enters the pictogram.

- You can enter pictograms consecutively if you press [📖] (Repeat) instead of [●] (Select).
- Pictograms are not displayed properly on some non-au cell phones, personal computers, and other devices.


Note

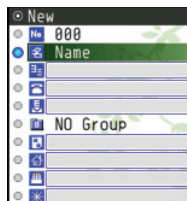
- When a character entry screen is displayed, you can enter pictogram, a symbol, emoticon, or alphanumeric character if you press [✱ ﾞﾟ小 記号] .

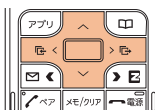
Phone Book

Saving a Phone Book Entry


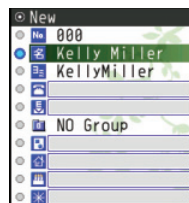
Hold down [book key] for at least one second.

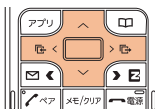
New screen

1 **Use [navigation key] to select [Name icon] (Name) and then press [center key] (Select).**


2 **Enter a name and then press [center key] (OK).**


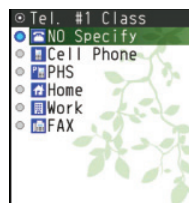
➡The [Reading icon] (Reading) for the name is entered automatically.

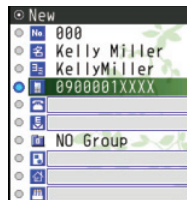
・For details on entering characters, see page 40.


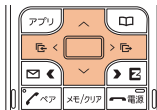


3 **Use [navigation key] to select [Tel icon] (Tel. #1) and then press [center key] (Select).**

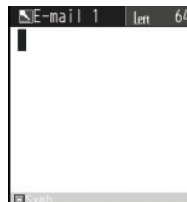
4 **Enter a phone number and then press [center key] (OK).**

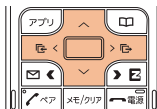
・If the phone number is for a regular phone, enter the phone number starting with the area code.


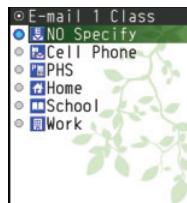
5 Use [navigation key] to select a phone number class and then press [center key] (Select).




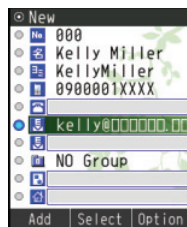
・Follow the next two steps to enter an e-mail address. If you do not want to enter an e-mail address, proceed to Step 9.

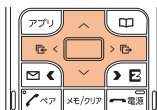
6 Use [navigation key] to select [E-mail icon] (E-mail 1) and then press [center key] (Select).




7 Enter the e-mail address and then press [center key] (OK).


・For details on entering e-mail addresses, see page 42.

8 Use [navigation key] to select an e-mail address class and then press [center key] (Select).


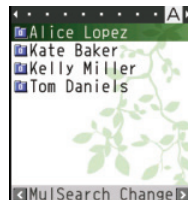


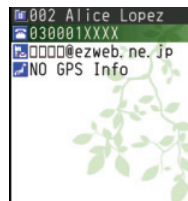
9 Press [アプリ] (Add).

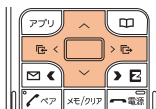
Note

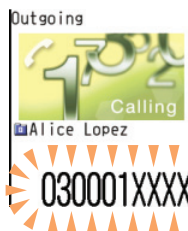
- The phone book can store up to 1,000 entries.
- The cell phone automatically saves an entry to the lowest available memory number from 000 to 999.
- You can save five phone numbers and five e-mail addresses for each phone book entry.
- You can also assign a group, and enter address, birthday, and other information.

Dialing from the Phone Book

1 **When the standby screen is displayed, press [📖].**


2 **Use [✥] to select the entry containing the phone number you want to dial and then press [●] (Select).**


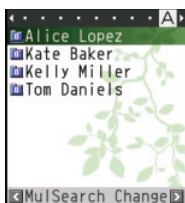


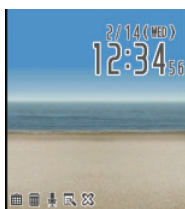
3 **Press [ペア].**


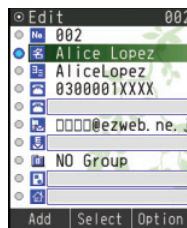
Note

- When Simple Mode is set, you can make calls to pair partners registered using the Pair function by simply holding down one of the keypad keys ([1] to [5]) for at least one second (one-touch dialing).

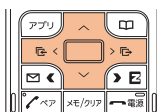
Editing Phone Book Entries

Phone Book




1 Press (Option) and then press 1 *Edit*.


2 Edit the contents and then press アプリ (Add).

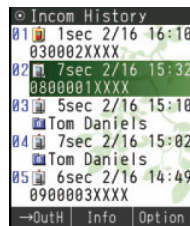
3 Use to select *Overwrite* and then press (OK).


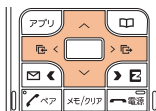
Note

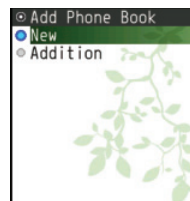
- In step 1, you can delete the selected address by pressing 2 *Delete* after you press (Option).

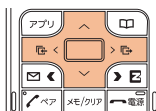
Saving a Phone Number from the Incoming or Outgoing History

Example: Saving a phone number from the incoming history to the phone book

1 **When the standby screen is displayed, press and use to select the phone number you want to save.**




2 **Press (Option) and then press 1 *Add Phone Book*.**


3 **Use to select *New* and then press (Select).**


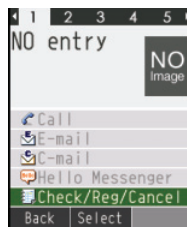
Note

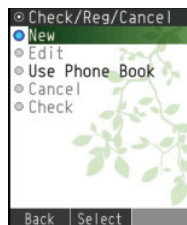
- For details on saving a phone book entry, see page 45.
- To open the Outgoing History screen for saving a phone number to the phone book, press in Step 1.

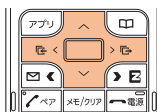
Pair Function

You can register a maximum of five pair partners you contact often to easily call or send mail. You can also invite pair partners to a Hello Messenger meeting.

Registering a Pair Partner

1 **When the standby screen is displayed, press [ペア key].**


2 **Use [navigation key] to select the *NO entry* screen and then press [center key] (Select).**




- If you select the already-registered pair partner, use [navigation key] to select *Edit* to edit the registered contents or select *Cancel* to cancel the pair partner.

3 **Use [navigation key] to select *New* and then press [center key] (Select).**

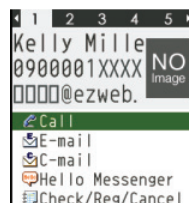
- You can also register a pair partner from *Use Phone Book*.

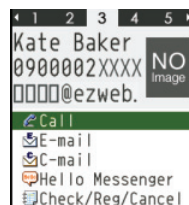
4 **Perform the procedure under "Saving a Phone Book Entry" on page 45.**

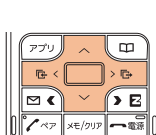
Note

- The member that you register in the Pair function is also registered in the phone book.
- When you delete the phone book entry registered in the pair partner, the phone book entry is also deleted from the Pair function.

Making a Call to a Pair Partner

1 When the standby screen is displayed, press [ペア].


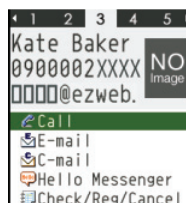
2 Use [◁▷] to select the person you want to call.


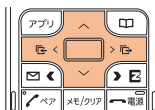
3 Use [△▽] to select *Call* and then press [●] (Select).


Note

- If multiple phone numbers and e-mail addresses are registered in a phone book entry, you can select the phone number and e-mail address to use with the Pair function.
- When Simple Mode is set, you can call pair partners by simply holding down one of the keypad keys ([1] to [5]) registered for up to five partners for at least one second.

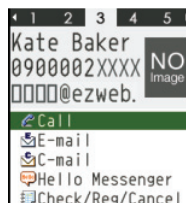
Sending a Mail to a Pair Partner

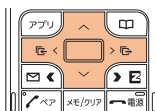
1 **When the standby screen is displayed, press [ペア] and then use [navigation key] to select the person you want to send a mail.**


2 **Use [navigation key] to select *E-mail* or *C-mail* and then press [center key] (Select).**


・To create an e-mail message, see "Creating and Sending E-mail Messages" on page 54. To create a c-mail message, see "Creating and Sending C-mail Messages" on page 62.

Inviting Members to a Hello Messenger Meeting from the Pair Partner Function

1 **When the standby screen is displayed, press [ペア] and then use [navigation key] to select the member you want to invite.**


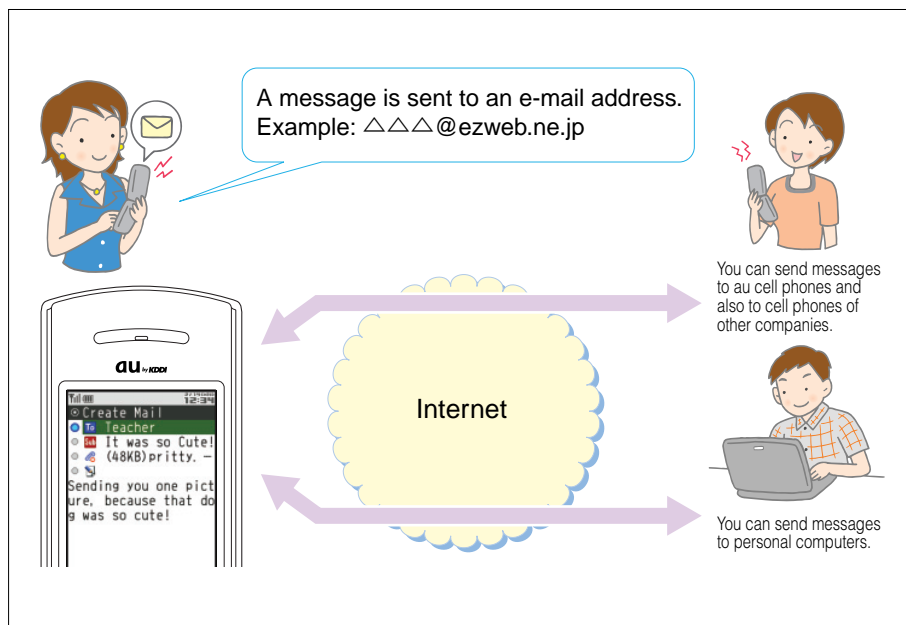
2 **Use [navigation key] to select *Hello Messenger* and then press [center key] (Select).**


・For the following procedure, see Steps 3 and 4 of “Inviting Members to a Meeting” on page 67.

Pair Function

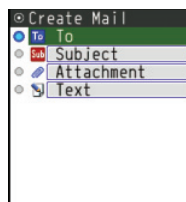
Mail

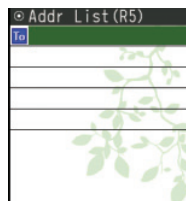
Using E-mail

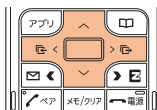
To use e-mail, you need to apply for an EZweb subscription. If you did not apply for an EZweb subscription at the time of purchase, contact an au shop or the au Customer Service Center. Also, before use, be sure to configure initial settings.
You can send and receive e-mail with another cell phone that supports e-mail, or with a computer. In addition to text messages that can contain up to 5,000 double-byte (or 10,000 single-byte) characters, you can also send photos and movies by e-mail.


* You can send an e-mail message to up to five different addresses at one time.
* You can send up to 1,000 e-mail messages per day (a message with multiple recipients is counted as more than one message).
* Sending and receiving e-mail messages that include attachment data may take a while.

Creating and Sending E-mail Messages

1 **When the standby screen is displayed, press [✉] and then press [1] *Create New*.**


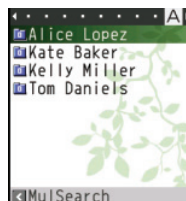
2 **Use [navigation key] to select *To* and then press [center key] (Select).**


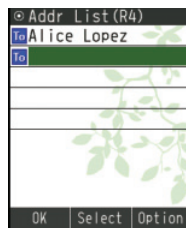


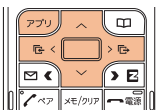
3 **Press [center key] (Select) and then press [1] *Use Phone Book*.**

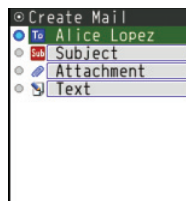
- You can specify up to five addresses for the To, Cc, and Bcc fields.
- You can also select *Use Sent Hist* to specify an address or *Direct Input* to enter an address directly.

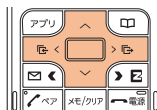
4 **Use [navigation key] to select an address, press [center key] (Select) and then press [アプリ] (OK).**

5 **Press [アプリ] (OK).**


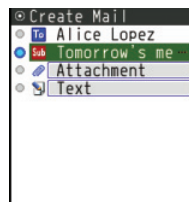


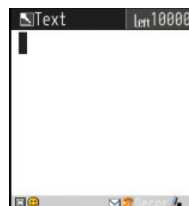


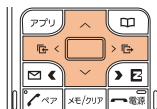


6 Use [navigation key] to select *Subject* and then press [center key] (Select).


7 Enter a subject and then press [center key] (OK).

- You cannot enter single-byte Japanese characters or a new line in a subject.


8 Use [navigation key] to select *Text* and then press [center key] (Select).


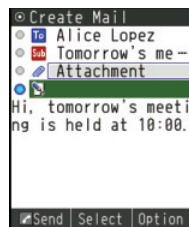


9 Enter the text of the message and then press [center key] (OK).

- You cannot enter single-byte Japanese characters in the text of a message.

10 Press [アプリ] (Send).

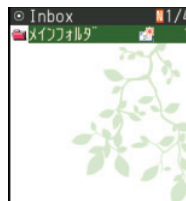
➡The e-mail message is sent.

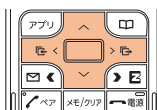
Sending E-mail


Reading Received E-mail Messages

When you receive an e-mail message

➡ *Email* appears on the standby screen along with the number of messages received.

1 **Use [navigation key] to select *Email* and then press [center key].**




Indicators

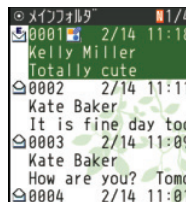
: Indicates a folder containing a new message.

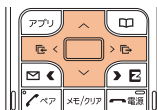
2 **Press [center key] (Select).**

Indicators

: Indicates a read message.

: Indicates an unread message.

: Indicates a message that has an attachment.


3 **Use [navigation key] to select the new message and then press [center key] (Select).**


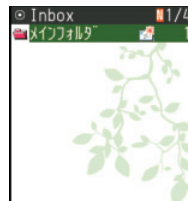
Viewing a Received Message
Note

- The procedure may differ depending on the e-mail settings.

Reading an E-mail Message from the E-mail Menu

When the standby screen is displayed, press [Mail key] to display the E-mail menu and then press [2] *Inbox*.

Indicators

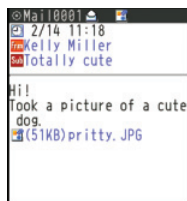
N X/X : The number on the right of the indicator indicates the number of unread messages.


For subsequent operations, see "Reading Received E-mail Messages" (Steps 2 and 3 on page 56).

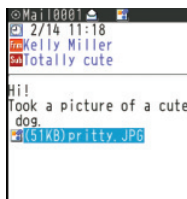
Mail

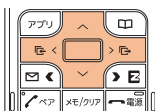
Reading an E-mail Message with an Attached Photo or Movie

Example: Viewing an attached photo

1 **Display the e-mail message (page 56).**


2 **Use [Navigation key] to select the file name and then press [Center key] (Rcv).**

3 **Press [Center key] (Play).**




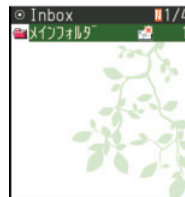
Mail

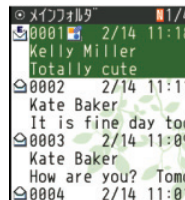
Note

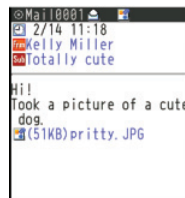
- Some files will already be displayed on the screen in Step 1, while other files will require that you select the file name (Step 2), and then press [Center key] (Play). It depends on the file size.

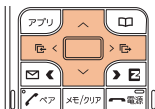
Replying to Received E-mail Messages

1 **When the standby screen is displayed, press [Mail key] and then press [2] *Inbox*.**

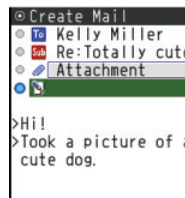
2 **Press [Center key] (Select).**


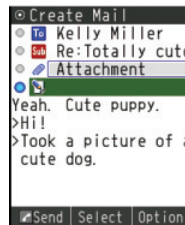


3 **Use [Navigation key] to select the message you want to reply to and then press [Center key] (Select).**




4 **Press [アプリ] (Reply).**

➡The Create Mail screen appears. "Re:" is prefixed to the subject, and the text of the message is quoted.


5 **Refer to "Creating and Sending E-mail Messages" (Steps 8 and 9 on page 55) and enter the text of the message.**


6 **Press [アプリ] (Send).**

➡The e-mail message is sent.

Mail

Rejecting Spam

The setting of mail filters to reject spam is recommended. Also, selecting ***サポート設定*** (Supportive Settings) enables you to set mail filters easily while answering questions that appear on the screen.

Setting Mail Filters

Example: Connecting to ***サポート設定*** (Supportive Settings)

When the standby screen is displayed, press [Mail].

➡Press [6] *E-mail Setup*.

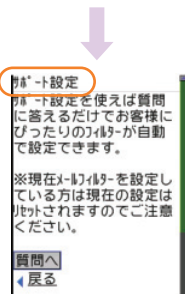
➡Press [3] *Mail Filter*.

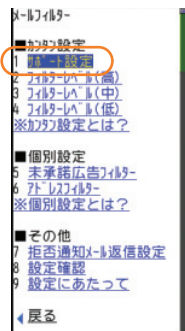
➡Use [Navi] to select ***次へ*** (Next) and then press [Center] (Select).

➡Use [Navi] to select the input box and then press [Center] (Edit).

➡Enter your security code, press [Center] (OK), and then follow the on-screen instructions.

・Your security code is the four-digit number you wrote on your subscription form.

Mail filter setting screen




カンタン設定 (Simple Settings)

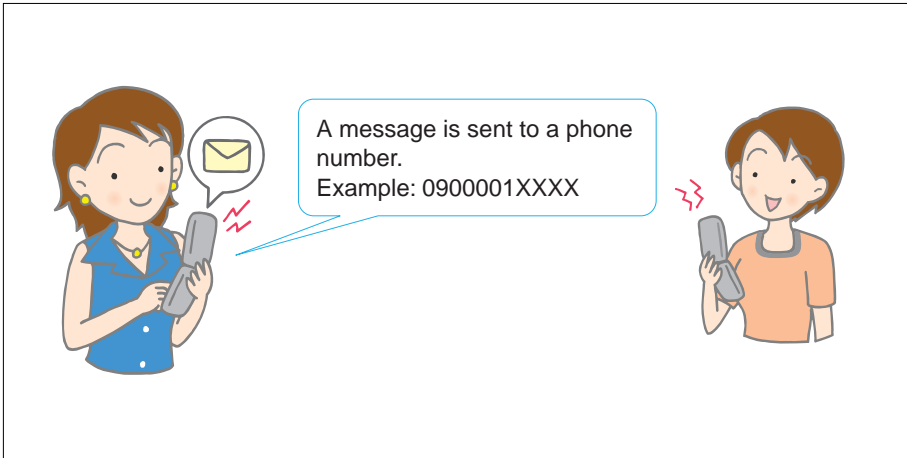
サポート設定 (Supportive Settings)	Set mail filters by just answering questions This is recommended for users who want to configure settings while confirming conditions.
フィルターレベル（高） Filter Level (High)	Shut out all mail from personal computers This is recommended for users who only want to receive mail from cell phones.
フィルターレベル（中） Filter Level (Medium)	Specify the mail of persistent senders to be blocked This is recommended for users being bothered by a certain person or by senders of spam mail.
フィルターレベル（低） Filter Level (Low)	Block unsolicited advertisement and spoof mail This is the minimum level recommended for all users.

Note

・You can also prevent spam by changing your e-mail address. For details on changing your e-mail address, see page 26.

Mail

Using C-mail

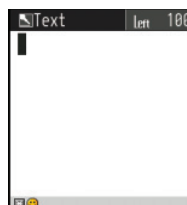
C-mail is a service that enables the use of phone numbers as addresses to exchange messages between au cell phones that support c-mail. A c-mail message can contain up to 50 double-byte (or 100 single-byte) characters.


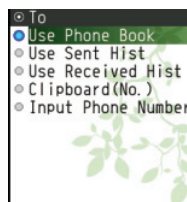
C-mail Safety Block

C-mail safety block is a function that allows you to reject to receive c-mails that include accessing URL (http://△△△, https//△△△) or phone numbers in the c-mail message text.
C-mail safety block is valid by default. You can cancel the setting if you want to receive c-mails that include accessing URL or phone numbers in the message text.

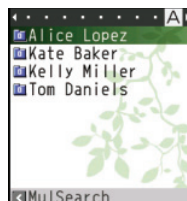
Creating and Sending C-mail Messages

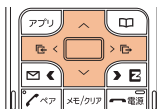
1 When the standby screen is displayed, hold down [Mail key] for at least one second, and then press [1] *Create New*.

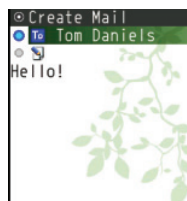
2 Enter the text of the message and then press [Center key] (OK).




3 Use [Navigation key] to select *Use Phone Book* and then press [Center key] (Select).

- You can also select *Use Sent Hist*, *Use Received Hist* or *Clipboard (No.)* to specify an address or *Input Phone Number* to enter an address directly.




4 Use [Navigation key] to select an address and then press [Center key] (Select) twice.


5 Press [アプリ] ([icon] Send).

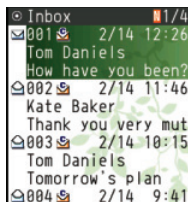
➡The c-mail message is sent.

Reading Received C-mail Messages

Received c-mail messages are saved to the Inbox.

When you receive a c-mail message

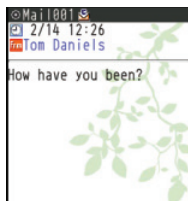
➡ *Cmail* appears on the standby screen along with the number of received messages.

1 **Use to select *Cmail* and then press .**


Indicators

: Indicates a read message.

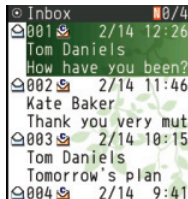
: Indicates an unread message.

2 **Use to select the new message and then press (Select).**


Reading a C-mail Message from the C-mail Menu

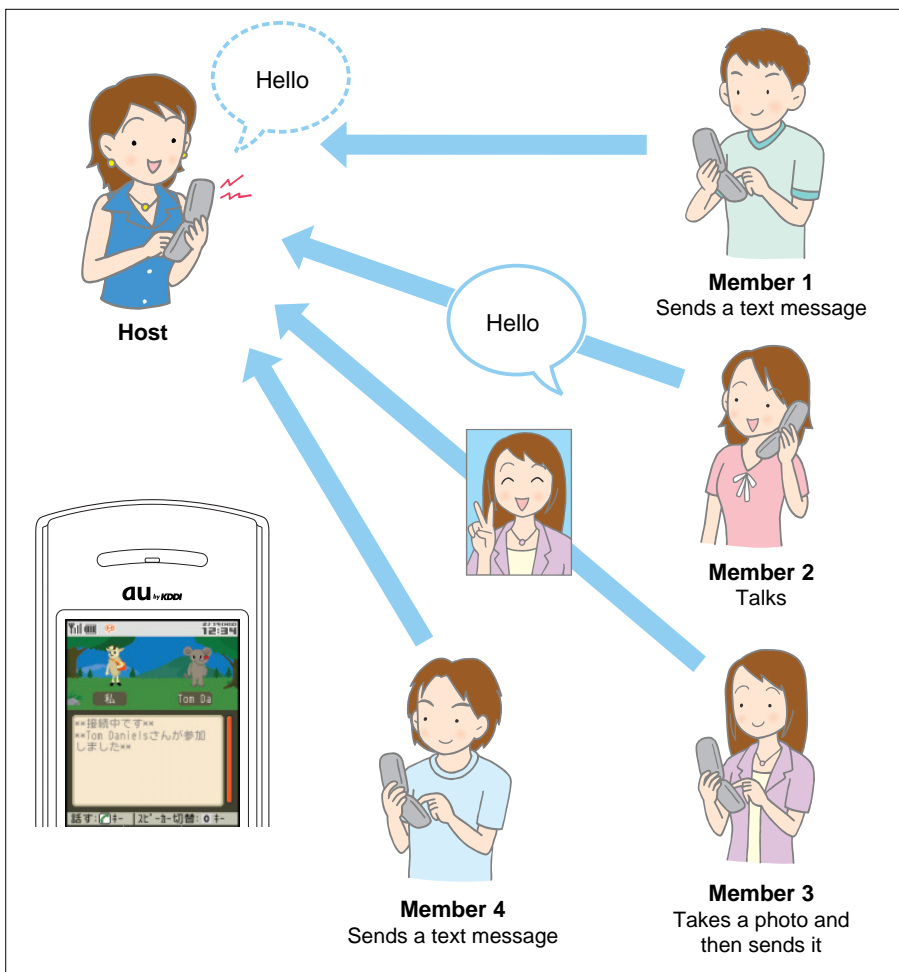
When the standby screen is displayed, hold down for at least one second to display the C-mail menu, and then press 2 *Inbox*.

Indicators

X/X : The number on the right of the indicator indicates the number of unread messages.


Use to select the message you want to read and then press (Select).

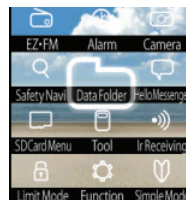
Hello Messenger

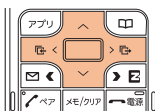
Hello Messenger is a service that enables you to use a desired cartoon-style character to represent you in a meeting (exchange text, sound, and other data in real time) between au cell phones that support Hello Messenger.
The host can select up to four members from the phone book to join the meeting.


Note

- Conditions such as frequent-use, location, and signal strength may result in battery power not lasting as long as usual.
- This service can be used by two to five members.

Displaying Hello Messenger

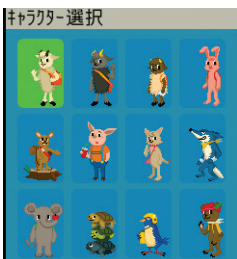
1 **When the standby screen is displayed, press .**


2 **Use to select *Hello Messenger* and then press (Select).**


When Starting Hello Messenger for the First Time

Press (OK), use to select your character, and then press (**設定**[Set]).

スタート (Start) Select the members to invite and then start the meeting.
コメントログ (Comment Log) Display the comment log (meeting history).
ヒント (Hint) Display information on the basic operations of Hello Messenger.
オプション (Options) Configure Hello Messenger settings.

Character list


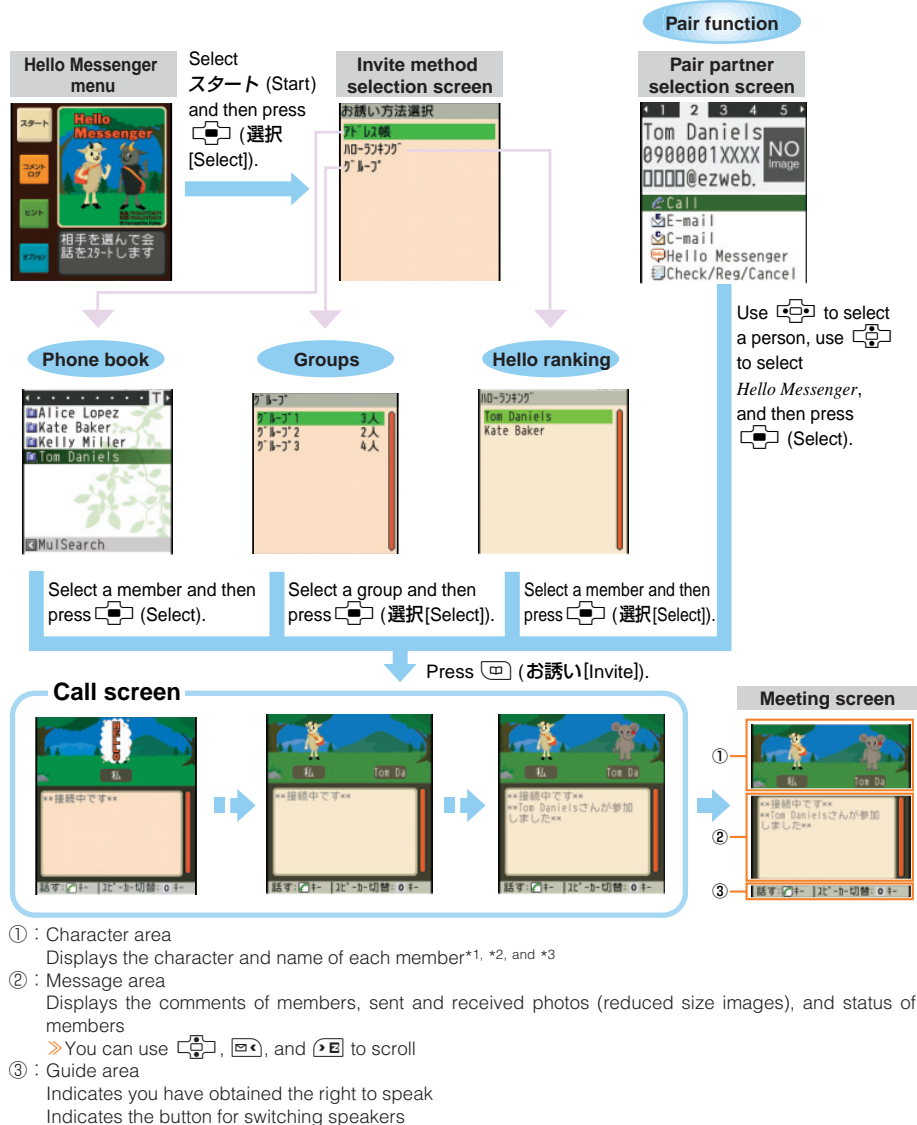
You can select from 12 different characters for Hello Messenger.

Holding a Meeting

You can start a meeting by selecting the members to invite to the meeting from the phone book, a group, or the hello ranking (members that you invited or that invited you to a meeting in the past), or use the Pair function to start a meeting.
The flow for inviting members to a meeting is as follows.

① : Character area
Displays the character and name of each member*1, *2, and *3

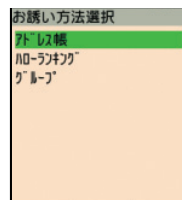
② : Message area
Displays the comments of members, sent and received photos (reduced size images), and status of members
≫You can use , , and to scroll

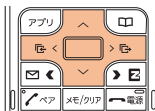
③ : Guide area
Indicates you have obtained the right to speak
Indicates the button for switching speakers


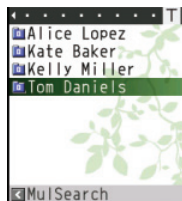
*1 The character changes in accordance with the status of a member.
*2 The name registered in your profile is displayed as your name. If no name is registered in your profile, 私 (Me) is displayed.
*3 If the phone number and name of the other party is registered in the phone book, the name registered in the phone book is displayed.

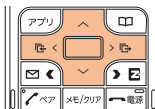
Inviting Members to a Meeting

You can start a meeting by inviting members registered in the members list.

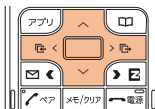
1 **Use [key] to select *スタート* (Start) from the Hello Messenger menu (see page 65) and then press [key] (選択[Select]).**




2 **Use [key] to select *アドレス帳* (Phone Book) and then press [key] (選択[Select]).**


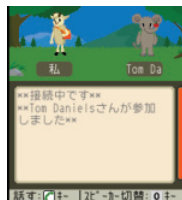


- You can also select *ハローランキング／グループ* (Hello Ranking/Group) to specify the members to invite.

3 **Use [key] to select the member you want to invite to the meeting, press [key] (Select), and then use [key] to select the phone number and press [key] (Select).**


- Your name (the name registered in the profile) is the first name displayed in the members list, and cannot be changed or deleted. If no name is registered in your profile, *私* (Me) is displayed.
  To add another member, press [key] (選択[Select]) and then repeat Steps 2 to 3.

4 **Press [key] (お誘い[Invite]).**

- An invitation notification is sent to members registered in the members list.
- When the message *○○さんが参加しました* (XXX Has Joined the Meeting) appears, the meeting can start.


Note

- You can register up to five members to the members list including yourself.
- You can also start Hello Messenger from the phone book, outgoing history, incoming history, and phone number input, and then start a meeting.

Accepting an Invitation to Join a Meeting

When you receive an invitation to a meeting, the ring tone sounds and/or the cell phone vibrates, and then a message inviting you to join the meeting appears. However, if *着信モード* (Incoming Mode) is set to *自動応答モード* (Auto Answer Mode), you join the meeting automatically without the ring tone sounding.

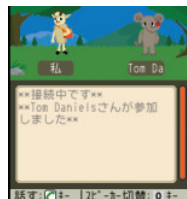
When you receive an invitation

➡A message (incoming call screen) inviting you to join the meeting appears.

・You can confirm the name of the host that invited you, the total number of members, and reception time on the incoming call screen.

1 Use [key] to select *参加* (Join) and then press [key] (OK).

➡The meeting screen appears and you can join the meeting.

・To reject the invitation to join the meeting, use [key] to select *不参加* (Do Not Join) and then press [key] (OK).


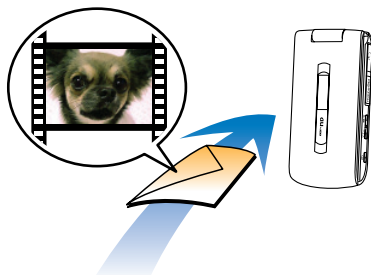
Note

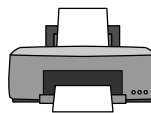
・The ring tone is not heard from the speaker and earphones when manner mode is turned on.

・Even if manner mode is turned on, priority for vibrator operation is given to the vibrator setting of the *ハロー着信音* (Hello Ring Tone) settings.

Camera

Your cell phone has a 1.3 megapixel camera (1,300,000 pixels available) that you can use to shoot photos and movies. It also has a self-timer for taking photos.
You can use images you record for the standby screen, and you can attach them to e-mail messages.

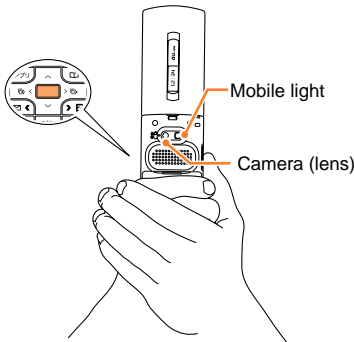
Camera Image Features


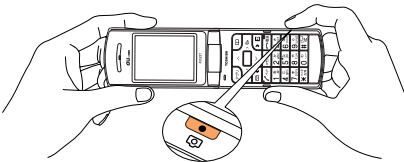


You can use a microSD™ memory card to transfer captured images to a personal computer or printer.

Displaying and Printing Images

Photo and Movie Shooting Tips

When shooting photos or movies, frame the subject within the display and hold the A5523T steady with both hands to avoid shaking.


Orient the A5523T so appears in the upper left of the display.


Orient the A5523T so appears in the upper left of the display.

About Photo and Movie Modes

The following modes are available for capturing photos and movies.

Photo Modes

(The default mode is *Wallpaper*.)

Mode	Save Location
Photo Mail：120 (W) ×160 (H) dots	The Photo Folder in the Data Folder of the cell phone.
Wallpaper/Multiple Shots：240 (W) ×320 (H) dots	
VGA：640 (W) ×480 (H) dots	The Digi-Came Fldr in the microSD™ memory card.*
SXGA：1280 (W) ×960 (H) dots	

Movie Modes

(The default mode is *HIGH L*.)

Mode	Save Location
STD S：96 (W) ×80 (H) dots	The Movie Folder in the Data Folder of the cell phone.
STD M, HIGH M：128 (W) ×96 (H) dots	
HIGH L：176 (W) ×144 (H) dots	
FULL：320 (W) ×240 (H) dots	The Movie Folder in the microSD™ memory card.*

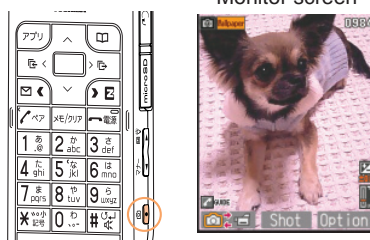
* When a microSD™ memory card (commercially available) is not inserted, the files are saved to the Data Folder of the cell phone.

Note

- To turn on the mobile light, press while the monitor screen is displayed.
- If you press ペア (GUIDE) while the monitor screen is displayed, the key-operation guidance screen will appear for approximately fifteen seconds.
- Confirm the positions of the lens and mobile light, and take care not to cover these parts with a strap or finger.

Taking a Photo

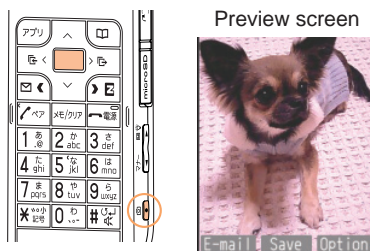
1 When the standby screen is displayed, hold down [camera key] for at least one second.

➡The monitor screen appears.


Monitor screen

2 Point the lens at the subject and then press [center key] (Shot) or [camera key].

➡The photo you just took appears.

Preview screen


Saving a Photo

Press [center key] (Save) in the preview screen.

Note

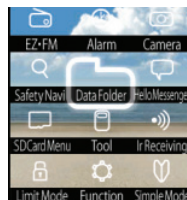
- If you do not want to save the photo, press [メモ/クリア] in the preview screen.
- The following shows how to read the file name in the Data Folder when you take a photo in the Wallpaper mode.

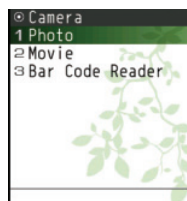
File Name Example : 070214_1234˜01

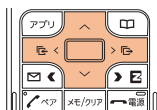
070214	1234	01
Recording Date: February 14, 2007	Time: 12:34	Serial Number: Photo 1

Recording a Movie

1 When the standby screen is displayed, press [center key].

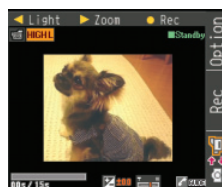
2 Use [navigation key] to select *Camera* and then press [center key] (Select).






3 Press [2] *Movie*.

➡The monitor screen appears.

4 Point the lens at the subject and then press [center key] (Rec) or [side key].


➡The cell phone emits a recording start sound, and ●REC lights when recording starts.

Stopping Recording

Press [center key] (Stop) or [side key].

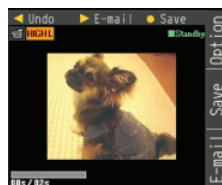
When You Stop Recording or the Recording Time Elapses

The first frame of the movie you just recorded appears (preview screen).

Preview screen

Playing Back a Movie Before it is Saved
Press [option key] (Option), use [navigation key] to select *Play*, and then press [center key] (Select).

Saving a Movie

Press [center key] (Save) in the preview screen.


Note

- If you do not want to save the movie, press [メモ/クリア] in the preview screen, use [navigation key] to select *Yes*, and then press [center key] (OK).
- The following shows how to read the file name in the Data Folder when you record a movie in the High L mode.

Attaching Photos or Movies to E-mail Messages

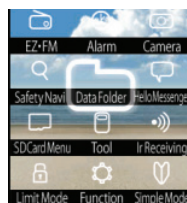
1 While the preview screen is displayed after shooting a photo or movie, press [アプリ] (E-mail).

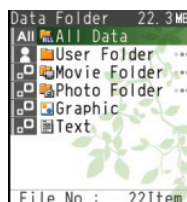
➡The photo or movie is attached to an e-mail message and the Create Mail screen appears.

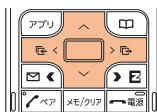
- The [attachment icon] (Attachment) indicator changes automatically to [attachment icon], indicating that an image has been attached. For details on creating an e-mail message, see page 54.

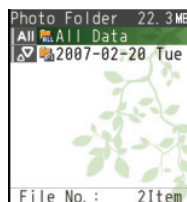
Viewing Photos or Movies

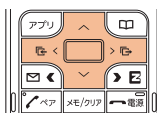
Example: Viewing a photo

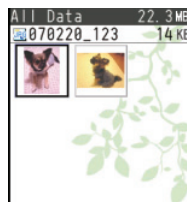
1 **When the standby screen is displayed, press .**


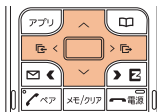
2 **Use to select *Data Folder* and then press (Select).**




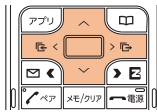
3 **Use to select *Photo Folder* and then press (Select).**
・To view a movie, select *Movie Folder*.




4 **Use to select a folder and then press (Select).**




5 **Use to select the photo you want to view and then press (Play).**

・You can attach the photo to an e-mail message by pressing (Option) and 1 *AttachToE-mail*.


EZweb

EZweb is an information service that allows you to enjoy using the Internet on your cell phone. You can also download Chaku-Uta®, news, and other data from web pages.
To use EZweb, you need to apply for an EZweb subscription.
If you did not apply for an EZweb subscription at the time of purchase, contact an au shop or the au Customer Service Center. Also, before use, be sure to configure initial settings.

Connect to the Internet

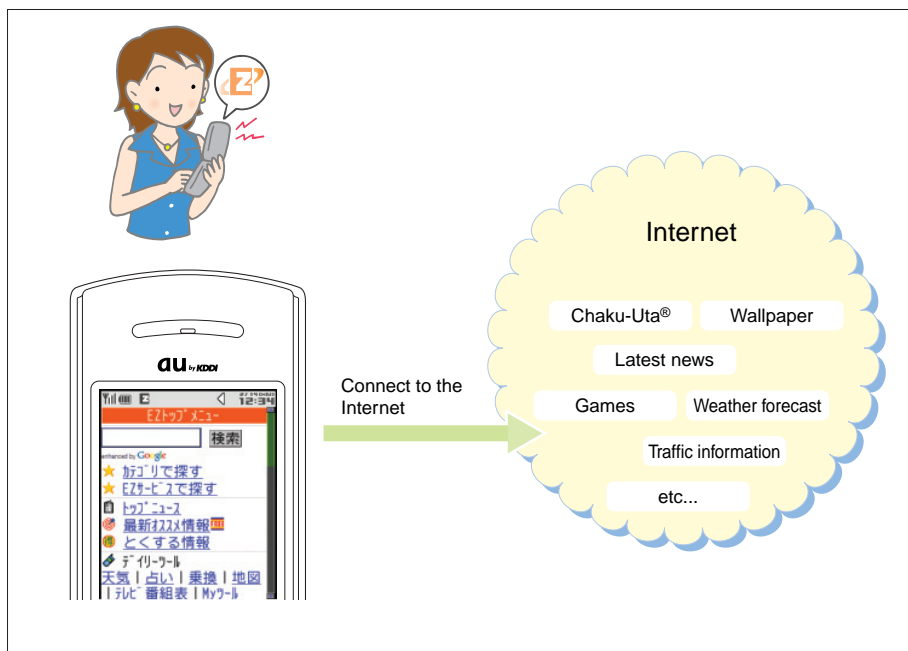
etc...


Note

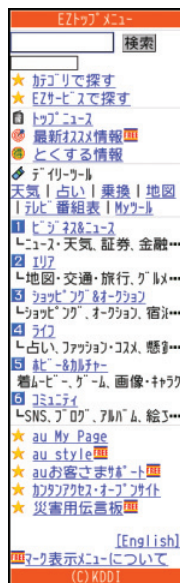
- The layout and content of the screens in this manual are only for the purpose of explanation. The layout and content of actual screens may be different from the ones shown here.
- In addition to communication charges, some sites charge for providing information.

Accessing Sites

Viewing the EZ Top Menu

You can access EZweb from the Top menu. A variety of useful and fun sites are available on EZweb.

EZ menu
(EZweb menu)
 Top Menu

Top menu


キーワード検索機能 (Search by Keyword)
Provides an information search function for searching by keyword.

カテゴリで探す (Search by Category)
Searches sites by category.

EZサービスで探す (Search by Useful EZ Service)
Introduces amusing and useful online services that EZweb offers.

トップニュース (Top News)
Provides automatic updates of the latest news.

最新オススメ情報 (Latest News)
Introduces useful information on sales campaigns and the latest items of interest.

とくする情報 (Valuable Information)
Presents gifts and push information to the EZweb subscriber for free.

デイリーツール (Daily Tools)
Provides daily bulletins such as weather reports and horoscopes as well as a train connections function.

ビジネス&ニュース (Business & News)
Provides the latest information, such as news and weather, and other useful information for your business.

エリア (Area)
Provides useful local information such as map searches and train connections.

ショッピング&オークション (Shopping & Auctions)
Provides shopping and auction information that you can use from your cell phone.

ライフ (Daily Life)
Provides useful information for daily living.

ホビー&カルチャー (Hobbies & Culture)
Provides the latest information, such as games, music and books, and popular information, such as hobbies and entertainment.

コミュニティ (Community)
Provides interesting and useful information that you can use for SNS or blogs.

au My Page
Provides useful information and tools tailored to your cell phone usage and a large area for storing files.

au style
Introduces information and sites that au recommends.

auお客さまサポート (au Customer Support)
Provides information about charges, various applications, au online manual and notices from au.

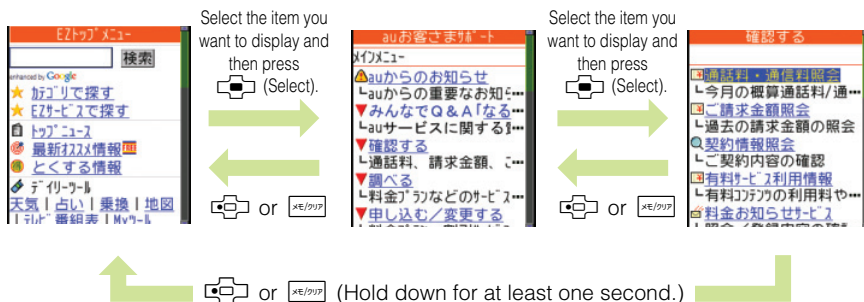
ｶﾝﾀﾝｱｸｾｽ･ｵｰﾌﾟﾝｻｲﾄ (Simple Access & Open Site)
Provides easy access and introduces open sites.

災害用伝言板 (Disaster Message Board)
Register and confirm safety information in time of disaster.

English
Introduces English sites.

Basic Operations

Use [key] to select the site you want to access and then press [key] (Select).

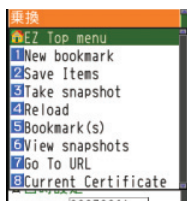
Pressing [key] or [メモ/クリア] returns to the previous screen. Holding down either key for at least one second returns to the Top menu.


The following describes the basic operations that are available while accessing sites.

Key Operation	Description
[電源 key]	Exits EZweb.
[up/down key]	Moves the cursor up and down. When there is data available above or below the current screen, scrolls the screen line-by-line.
[mail key]、[EZ key]	When there is data available above or below the current screen, scrolls the screen page-by-page. [mail key]：Scrolls one page up. [EZ key]：Scrolls one page down.
[left key]、[メモ/クリア]	Returns to the previous screen.

Bookmarking Frequently Accessed Pages

You can save the titles and URLs you often visit, which makes it easy to return to them when you want.

1 When the page you want to bookmark is displayed, press [📖] (Browser menu).


2 Press [1] *New bookmark*.

・Some pages cannot be bookmarked.

3 Press [アプリ] (Regist).

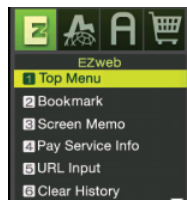
➡The displayed page is bookmarked, and its title and URL are added to the Bookmark.

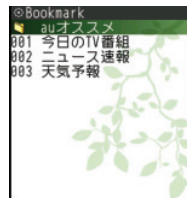
Note

・The Bookmark can contain up to 100 titles and URLs.

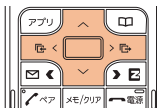
Viewing Bookmarked Pages

1 **When the standby screen is displayed, press [›E] and then use [◀▶] to select the *EZweb*.**

2 **Press [2] *Bookmark*.**


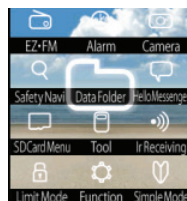


3 **Use [▲▼] to select the bookmark for the page you want to view and then press [●] (Access).**

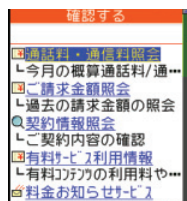
➡The cell phone connects to the site.


Checking Charges

You can use EZweb to check call charges, communication charges, and other information.

1 **When the standby screen is displayed, press [●].**


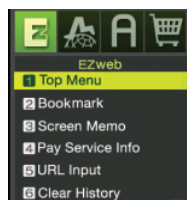
2 **Press [1] [1] and then press [●] (OK).**

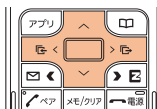
・Select the item you want to check and then follow the on-screen instructions.


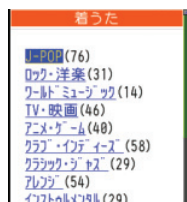
EZweb

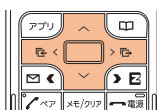
Downloading Chaku-Uta®

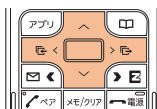
1 **When the standby screen is displayed, press [›EZ] and then use [navigation key] to select the *EZweb*.**

2 **Press [1] *Top Menu*.**


3 **Use [navigation key] to select *カテゴリで探す* (Category Search) and then press [center key] (Select).**


4 **Use [navigation key] to select *着うた* (Chaku-Uta®) and then press [center key] (Select).**




5 **Use [navigation key] to select the site you want to access and then press [center key] (Select).**


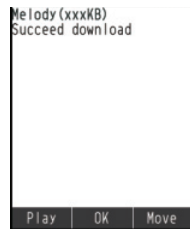
➡The download procedure appears.

・To use information sites that charge for providing information, you need to enter your EZ password or Premium EZ password. Follow the on-screen instructions to enter the password.
See page 12 for details.

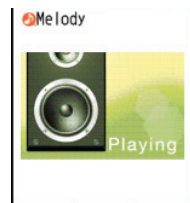
EZweb

Follow the instructions that appear on the display.

➡Download is completed.

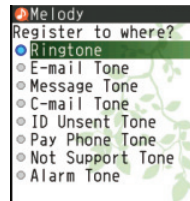
・Downloaded data is saved automatically to the Data Folder.


Press [アプリ] (Play).

➡The downloaded Chaku-Uta® plays.


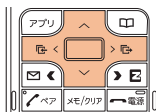
During playback, press

(Regist).

➡The Register to where? menu appears.


Use [key] to select the tone you want to use the Chaku-Uta® for and then press [key] (OK).

➡The Chaku-Uta® is set as a tone.

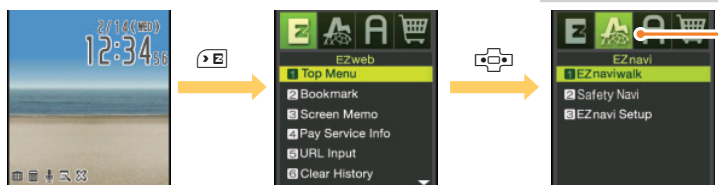
・You can use the same operation to download an image and set it to the standby screen, etc.


Note

・This procedure is only an example for the purpose of explanation and may differ from actual procedures. Follow the instructions on the site from which you want to download the data.

EZ Navi Features

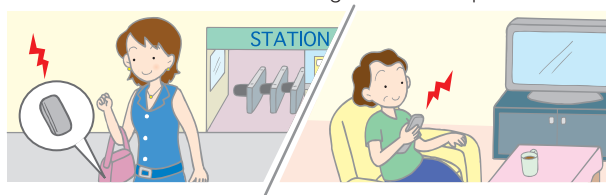
Using GPS (Global Positioning System), EZ Navi provides useful positional information services.

EZnavi menu


Safety Navi to check where your kids are

The Safety Navi application is made up of 3 functions.

- いつでも位置確認 (Auto Position Search [monthly charge]), 位置確認メール (Position Search Mail [no monthly charge])
  Using Position Search from the A5523T enables you to locate an au cell phone equipped with Position Search.

- エリア通知 (Area Message [no monthly charge])
  When you enter (or are in) or leave (or are no longer in) a specified area during a predetermined time period, this feature automatically sends a notification e-mail to a designated au cell phone.


EZnaviwalk
Safety Navi
EZnavi Setup

EZ Navi

Note

- You can also launch Safety Navi from the Launcher menu.
  See page 22 for more information on using the Launcher menu.

EZ Navi Walk for when you go out

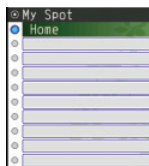
Displays various useful menu items for when you are out.

ナビをする*1	Search for the best route to your destination (音声ナビ[voice navigation]) or for local stores or facilities.
地図を見る（FREE）*1	Check out maps of your current location or places you like to go.
乗換検索する(FREE*2) *1	Search for train connections, timetables and other train service information.
道路情報を見る	Check out information on roads throughout Japan in real time.
もっとナビウォーク	Configure your settings or get help on PC searches.
インフォメーション	Sign up as a member or make an inquiry.

*1 You can use your voice to configure your settings (Voice input function).
*2 Some of the menu options attract a monthly charge.

Train Transfers

You just key in your departure station and destination station and this function will tell you which line to take, where to change trains, the train times and the trip duration. It even knows the times of the first and last trains.

My Spot


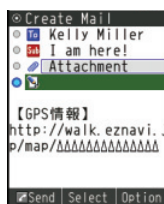
You register locations such as your home and the places you most often go, and this function provides simple navigation instructions.

A Map of Your Current Location

Map screen

★ represents your initial location. As you start moving, changes of your location are tracked by continuous positioning and indicated in real time by .

Selecting *今いる場所の地図* (A Map of Your Current Location) displays the current map in real time.

Current Mail


When, for example, you have arranged to meet someone, you can send a message to let the person know your current location.

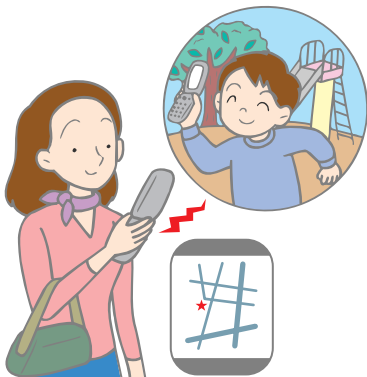
Navigation engine by NAVITIME JAPAN
地図：昭文社／住友電工

Note

- Before using this function, you must first specify the EZweb initial settings. Set the initial settings prior to use. If you have not set the initial settings, see page 25.
- When you use EZ Navi, information charges apply in addition to the packet communication charge.
- The screen shown here is just one sample of the layout and the information displayed. The actual screen may differ.

What You Can Do with Safety Navi

Safety Navi lets you use your A5523T to check on the location of an au cell phone or have it sound an alarm to notify you when the au cell phone is in a particular area during a specified time period.

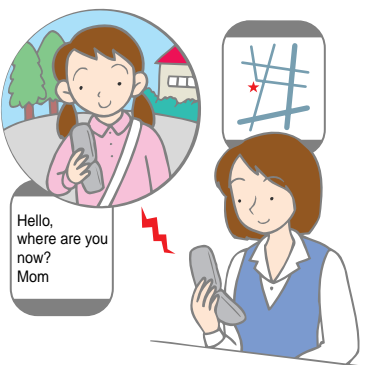
①いつでも位置確認(Auto Position Search)


【Features】

You and your child can pre-register each other's cell phones. When you check your child's position, you will be able to know the current location automatically without your child having to do anything.

* A monthly fee payment is required for using this service.

Example: Searching for the location of your child

②位置確認メール(Position Search Mail)


【Features】

You can send a message to your child to check his or her position. If your child is registered in the phone book, you can check your child's location easily even if you are not registered as a member for Position Search.

* Checking your child's location requires the child to operate his or her phone.

Example: Sending Position Search Mail to your child

③エリア通知(Area Message)

【Features】
You do not have to worry about your child even when he/she is out alone. The cell phone that he/she carries automatically sends you a message when he/she passes the specified area on his/her usual way back home from school, etc.

Example: An Area Message tells your child has just passed the area

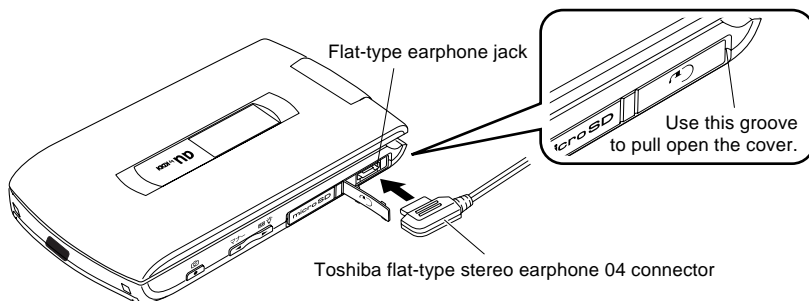
Note

- Safety Navi services are available only between au cell phones that are compatible with those services.
- Before using Safety Navi, you need to agree to the terms of use for Safety Navi and set a Navi password when you first start Safety Navi.
  * The terms of use also need to be agreed on the other cell phone.
- If the cell phone is having difficulty receiving a GPS satellite signal, in an underground shopping area, inside a building, or in the shadow of a building, the position displayed may differ from the actual position.
- If the cell phone obtains position information that differs from the actual position, the Area Message may not be accurate.
- Position Search is not available in such cases as when the cell phone you are searching for is out of range, rejecting to be searched or operating some other application; or when it is no longer compatible with Position Search because the relevant application has been deleted, etc.
- This service becomes unavailable, when The Use Suspension Course of Price Safety Service is activated and the charge reaches the upper limit.
- The screen images shown in this manual are only examples and may be different from the actual display.
- You cannot use Safety Navi if you have stopped using c-mail.
- If the M425 *EZapps Restrict* is set to *ON*, you can use Safety Navi by keying in the Lock No. and temporarily canceling the restriction. However, you cannot receive list registration notifications, Position Search notifications and you cannot launch Area Message at a specified time.
- EZapps transmission is included in the free calling time provided by your service plan. However, family c-mail and packet communications discount services do not apply.
- When the A5523T displays maps or collects Position Search information, information charges apply in addition to the packet communication charge.

EZ･FM

You can use your A5523T to listen to the FM radio. You can also record songs broadcast over the radio.

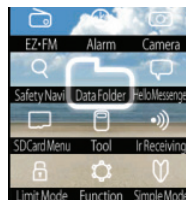
Antenna

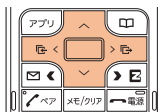
The bundled Toshiba flat-type stereo earphone 04 has a built-in antenna for listening to the FM radio. When you want to listen to EZ･FM radio, be sure to connect the earphone so that you can receive the signal.


Note

- When you use the Toshiba flat-type stereo earphone 04, be sure to keep the connector straight when you plug it into the flat-type earphone jack.

Listening to EZ･FM

1 **When the standby screen is displayed, press [center key].**


2 **Use [direction key] to select *EZ･FM*, press [center key] (Select), use [direction key] to select *承諾する* (Agree), and then press [center key].**


- Important notes are displayed.
- A screen for selecting your area appears the first time you start EZ･FM. Select the area you will use your cell phone.

EZ･FM

Note

- Before using this feature, you must first specify the EZweb initial settings. If you have not set the initial settings, see page 25.
- Listening to EZ･FM is free of charge. However, packet communication charges apply for using services for displaying song names, etc.
- You can record EZ･FM broadcasts.
- The layout and content of the screens in this manual are only for the purpose of explanation. The layout and content of actual screens may be different from the ones shown here.
- If you are listening indoors, you may be able to improve the reception by moving closer to a window.

Basic Operations

EZ・FM Screen

Frequency display area
- You can use to manually select a station in increments of 0.1 MHz.
- You can hold for at least one second to automatically select a station.

Displayed when there is downloadable information
Speaker/Earphone toggle display

Station/Song name display area
- The name of the broadcast station is normally displayed.
- You can display information such as the artist name and song name by pressing (song name display). Information may not be provided depending on the program.

Banner display area

Controlling the radio

Key used	Action
	Changes the station. By pressing any key from 1 to 9, you can switch between the radio stations assigned to the different keys.
ﾒﾓ/ｸﾘｱ ⇒	Tunes the radio in 0.1 MHz increments. · Hold down for at least one second to automatically tune the radio. · You can enter the frequency directly using the keypad keys (1 to 9).
、	Raises the volume.
、	Lowers the volume.
電源	Exits EZ・FM. Use to select *Exit* and then press (OK).

EZ・FM

Switching to Background Music Reception or Exiting EZ・FM

1 **Press [電源] and then press [1] *Suspend (BGM)* or [2] *Exit*.**

Note

・When you first purchase the A5523T, it is set to automatically exit EZ・FM if you do not press any of the keys for approximately 2 hours. You can change this in the ***ラジオ自動終了*** (Auto Radio Exit) setting.

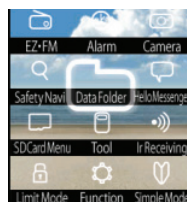
Limit Mode

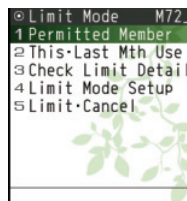
Limit Mode allows a parent or superior to limit how much each function can be used to prevent overuse of the cell phone by a child or subordinate. Limits can be placed on incoming and outgoing calls and c-mail.

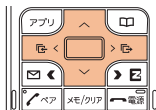
Registering Permitted Members

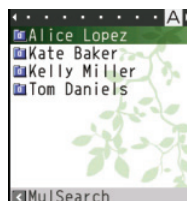
If you register permitted members, your cell phone allows incoming and outgoing calls and c-mail from/to them regardless of the Use Limit settings.

1 **When the standby screen is displayed, press [center key].**

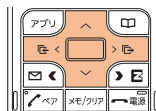
2 **Use [navigation key] to select *Limit Mode* and then press [center key] (Select).**


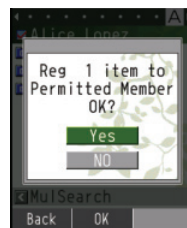




3 **Press [1] *Permitted Member*.**


4 Use [key] to select a phone book entry and then press [key] (Select).

5 Press [アプリ] (OK).


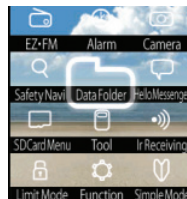


6 Use [key] to select *Yes* and then press [key] (OK).

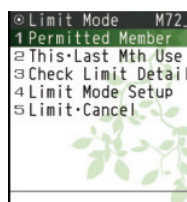
Limiting Calls and C-mail

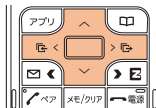
You can limit incoming and outgoing calls and c-mail (Access Limit).

Example: Only allowing outgoing calls to permitted members

1 When the standby screen is displayed, press [center key].


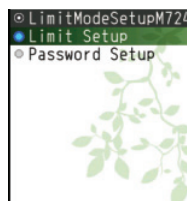
2 Use [cursor key] to select *Limit Mode* and then press [center key] (Select).

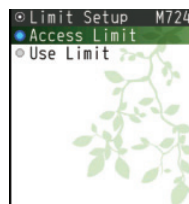
3 Press [4] *Limit Mode Setup*.


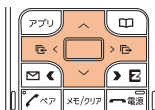


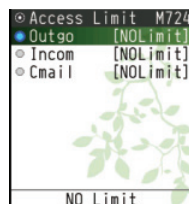
4 Enter your Limit Mode password and then press [center key] (OK).

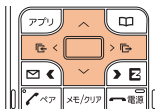
・The initial default password is "12345678".

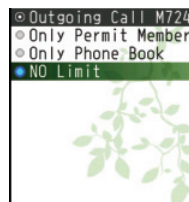
Limit Mode


5 Use [key] to select *Limit Setup* and then press [key] (Select).




6 Use [key] to select *Access Limit* and then press [key] (Select).




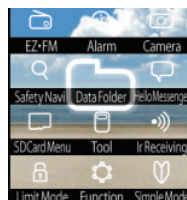
7 Use [key] to select *Outgo* and then press [key] (Select).


8 Use [key] to select *Only Permit Member* and then press [key] (Select).

Setting Use Limits

You can configure your cell phone to prohibit outgoing calls and/or c-mail if the monthly planned use limit will be exceeded.

Example: Limiting the call amount

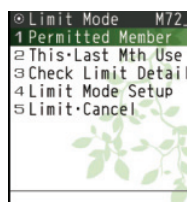
1 **When the standby screen is displayed, press [center key].**


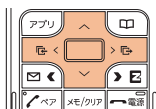
2 **Use [navigation key] to select *Limit Mode* and then press [center key] (Select).**

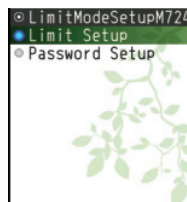
3 **Press [4] *Limit Mode Setup*.**

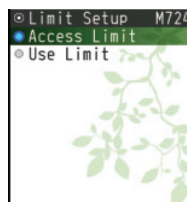
4 **Enter your Limit Mode password and then press [center key] (OK).**

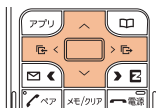
・The initial default password is "12345678".

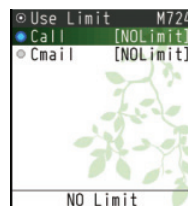
5 **Use [navigation key] to select *Limit Setup* and then press [center key] (Select).**


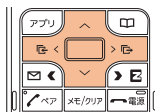


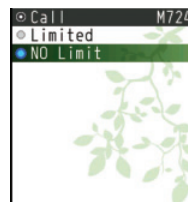


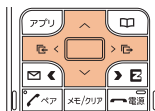


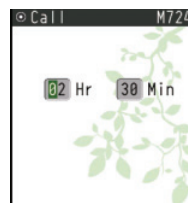


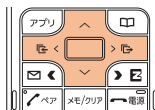
6 Use [key] to select *Use Limit* and then press [key] (Select).




7 Use [key] to select *Call* and then press [key] (Select).




8 Use [key] to select *Limited* and then press [key] (Select).




9 Enter the call amount and then press [key] (OK).

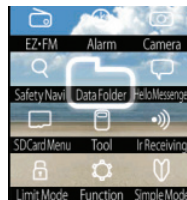
Limit Mode

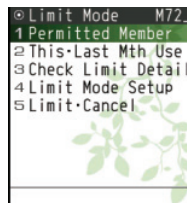
Note

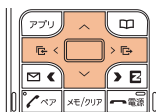
- Your cell phone does not place limits on outgoing calls and c-mail to permitted members even if the set use amount will be exceeded.

Turning Limit Mode On and Off

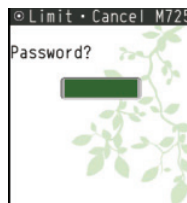
1 **When the standby screen is displayed, press [center key].**

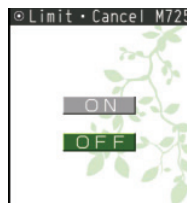
2 **Use [multi-directional key] to select *Limit Mode* and then press [center key] (Select).**






3 **Press [5] *Limit·Cancel*.**

4 **Enter your Limit Mode password and then press [center key] (OK).**


・The initial default password is "12345678".


5 **Use [multi-directional key] to select *ON* and then press [center key] (OK).**

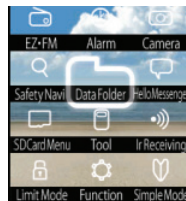
Note

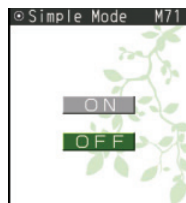
・You can change your Limit Mode password.

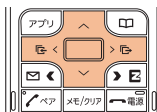
Simple Mode

Setting Simple Mode enables limited and simplified operations of the phone function, phone book, camera, mail, EZweb and other often-used functions.

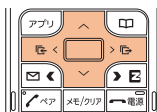
Entering Simple Mode

1 **When the standby screen is displayed, press .**


2 **Use to select *Simple Mode* and then press (Select).**


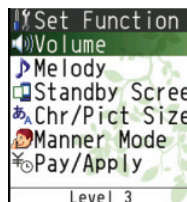


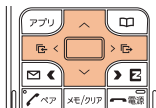
3 **Use to select *ON* and then press (OK).**

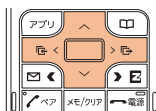
➡This enters Simple Mode.


Exiting Simple Mode

1 **When the standby screen is displayed, press .**

2 **Use to select *Setup* and then press (Select).**




3 **Use to select *End Simple Mode* and then press (Select).**


4 **Use to select *Yes* and then press (OK).**

➡This exits Simple Mode.

Simple Mode

Note

- If you cancel Simple Mode, the standby screen wallpaper selected in Simple Mode is still displayed in normal mode.

Viewing the Display in Simple Mode

The following indicators are available for checking the status on the standby display when your cell phone is in Simple Mode.

Indicator		Description
①		Indicates signal strength.
②		Indicates battery level.
③	—	Indicates the current date and time.
④		Indicates the manner mode is turned on.
⑤		Indicates the voice memo or manner mode is turned on.
⑥		Indicates the side keys are locked.
⑦		Indicates a microSD™ memory card (commercially available) is inserted.
⑧	—	Display the alert window.

* is displayed when you missed a call to notify you that someone called (missed call).

About the Alert Window

The alert window appears when you are unable to answer a call or a message is received. Use to select an item and press to check its details.

Note

- The date and time are set automatically.
- The layout and content of the screens in this manual are only for the purpose of explanation. The layout and content of actual screens may be different from the ones shown here.
- If *Hamabe* (the default setting) is selected as the standby screen wallpaper in normal mode, the wallpaper when you switch to Simple Mode is set to *Tebiki*. If something other than *Hamabe* is selected as the standby screen wallpaper in normal mode, the same wallpaper is displayed when you switch to Simple Mode.

Viewing the Simple Menu

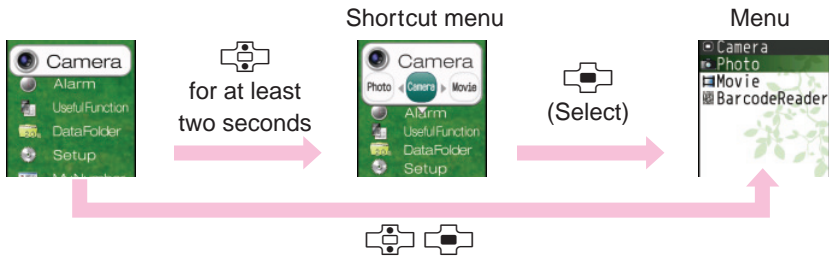
You can display the Simple menu by pressing when the standby screen is displayed. If you use to select a function and then wait at least two seconds, the Shortcut menu appears. Also, if you use to select a function and then press (Select), a menu appears.

Example: To view the Camera menu

Shortcut menu

Menu

for at least two seconds

(Select)


Indicator	Function Name	
	Camera	Photo Movie Barcode Reader
	Alarm	
	Useful Function	Calendar Notepad Calculator Ir EZ•FM Toshiba Site
	Data Folder	All Photo Folder Movie Folder SD Card
	Setup	Volume Melody Standby Screen Character/Pict Size Manner Mode Pay/Apply End Simple Mode
	My Number	

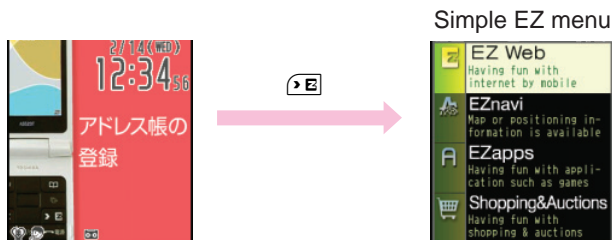
Note

- For details on the key assignment and basic operations, see page 14.
- For details on how to use phone functions, see “Making and Answering Calls” on pages 29 to 39.

Using the Simple EZ Menu

The Simple EZ menu provides a quick and simple way to access functions such as EZweb and EZ Navi.

When the standby screen is displayed, press [EZ key] to display the Simple EZ menu.

Use [navigation key] to select a menu item, press [center key] (Select), use [navigation key] to select a function, and then press [center key] (Select).


Simple EZ menu

You can access the following functions from the EZ menu while the cell phone is in Simple Mode.

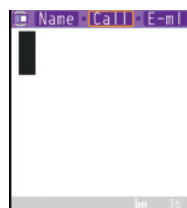
Saving a Phone Book Entry Using Simple Mode

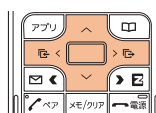
1 When the standby screen is displayed, press [Phone Book key].

2 Use [navigation key] to select *Yes* and then press [center key] (OK).

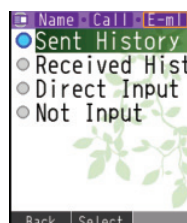
3 Enter a name and then press [center key] (OK).

4 Use [navigation key] to select *Direct Input* and then press [center key] (Select).

- If you do not want to enter a phone number,use [navigation key] to select *Not Input*, press [center key] (Select), and then proceed to Step 6.
- You can also use [navigation key] to select *Outgo History* or *Incom History* and enter a phone number from there.


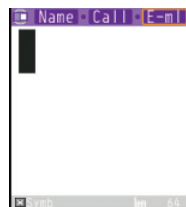


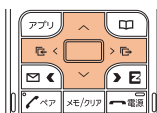
5 Enter a phone number and then press [center key] (OK).

- If the phone number is for a regular phone, enter the phone number starting with the area code.


6 Use to select *Direct Input* and then press (Select).

- If you do not want to enter an e-mail address, use to select *Not Input*, press (Select), and then proceed to Step 8.

- You can also use to select *Sent History* or *Received Hist* and enter an e-mail address from there.




7 Enter an e-mail address and then press (OK).

- You can use to select an item and then press (Edit) to edit something you have already entered, or to configure call ring tone and mail ring tone settings.
8 Press アプリ (Add).

➡The entry is saved in the phone book.

Note

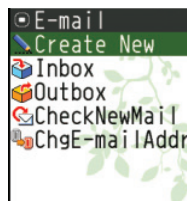
- When you have already stored data in the phone book, pressing while the standby screen is displayed displays a phone book list. To store new phone book data, press アプリ (New) and perform Steps 3 through 8 of the above procedure.
- To edit phone book contents, press while the standby screen is displayed. Use to select the phone book entry you want to edit, press (Select), and then press (Edit).
- To delete an entry stored in the phone book, press when the standby screen is displayed and then use to select the entry you want to delete. Press (Delete), use to select *Yes* and then press (OK).

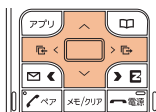
Creating and Sending E-mail/C-mail Messages in Simple Mode

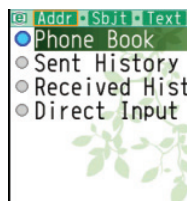
Example : Creating and sending an e-mail message

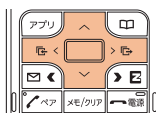
1 **When the standby screen is displayed, press [mail key].**

2 **Use [navigation key] to select *E-mail* and then press [center key] (Select).**

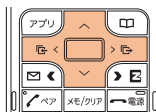
- To create a c-mail message, select *C-mail*. With c-mail you enter the text first and then enter the address.


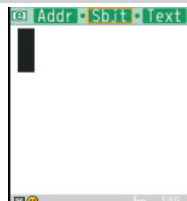


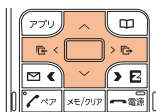
3 **Use [navigation key] to select *Create New* and then press [center key] (Select).**


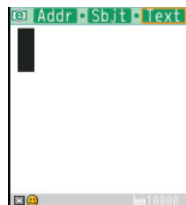


4 **Use [navigation key] to select *Phone Book* and then press [center key] (Select).**

- You can specify only one address.
- Only entries that include an e-mail address are displayed.
- You can also use [navigation key] to select *Sent History*, *Received Hist* or *Direct Input* and select an address from there.


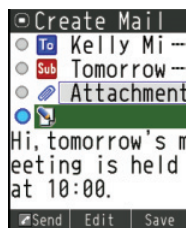
5 **Use [navigation key] to select the recipient you want to send to and then press [center key] (Select).**




6 Enter a subject and then press [key] (OK).


7 Enter the text of the message and then press [key] (OK).

・You can use [key] to select an item and then press [key] (Edit) to edit the currently selected item.

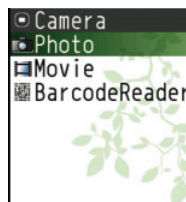
8 Press [アプリ] (Send).


➡The e-mail message is sent.

Simple Mode

Taking Photos in Simple Mode

1 When the standby screen is displayed, press [key].

2 Use [key] to select *Camera* and then press [key] (Select).


3 Use [key] to select *Photo* and then press [key] (Select).

➡The monitor screen appears.

Monitor screen

4 Point the lens at the subject and then press [key] (Shot) .

➡The photo you just took appears.

Preview screen

Saving a Photo

Press [key] (Save) in the preview screen.

Viewing Photos in Simple Mode

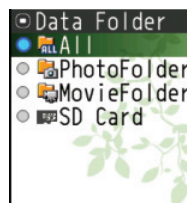
1 When the standby screen is displayed, press [center key].

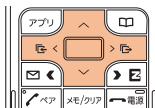
2 Use [navigation key] to select *DataFolder* and then press [center key] (Select).

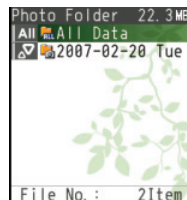
3 Use [navigation key] to select *PhotoFolder* and then press [center key] (Select).

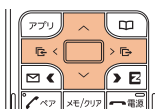
4 Use [navigation key] to select a folder and then press [center key] (Select).

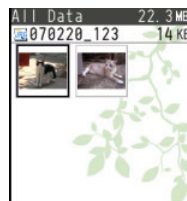
5 Use [navigation key] to select the photo you want to view and then press [center key] (Play).

Simple Mode










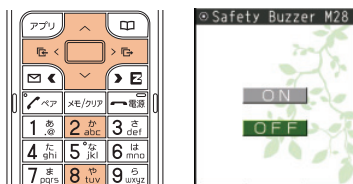
Other Functions

Using the Safety Buzzer

The A5523T is equipped with a Safety Buzzer function.
The Safety Buzzer can used to make a loud noise in emergency situations.

Safety Buzzer Settings

1 When the stanby screen is displayed, press [center key] [2 abc] [8 tuv], use [direction key] to select *ON* and then press

(OK).


・At the time of purchase, the Safety Buzzer is set to *OFF*.

To sound the Safety Buzzer

When the stanby screen is displayed, hold down [#] for at least one second.

To stop the Safety Buzzer

Enter the Lock No. and press [center key] (OK).
Keying in an emergency services number (110, 119 or 118) also stops the Safety Buzzer.

Note

- The Safety Buzzer continues until you turn it off or remove the battery pack or until the battery pack runs out of charge.
- You cannot adjust the buzzer volume.
- The buzzer is emitted through the speaker even when the Toshiba flat-type stereo earphone 04 is connected or manner mode is selected.
- The Safety Buzzer is not necessarily intended to prevent crime or to protect your safety.
- Do not sound the Safety Buzzer close to your ear. This could damage your hearing.
- Take care when setting up or using the Safety Buzzer as it can be activated accidentally (by a child, etc.).
- The Safety Buzzer will not sound from screens other than the standby screen, when a Standby EZapps is starting up or when the cell phone is turned off.
- You cannot receive calls while the A5523T is emitting the Safety Buzzer. Also, you cannot make calls other than to the emergency services (110, 119 or 118).

In addition to the functions covered in this Basic Manual, the A5523T also has the following convenient features.

EZapps (BREW®)

You can enjoy using various applications including large games that are rich in expressive content and standby applications.

Infrared Communication

You can exchange data such as phone book entries, schedule data, and image data in Data Folder with devices equipped with an infrared communication function.

Fonts

You can change the font (character design) for characters on the display.

Emission OFF

This feature prevents your cell phone from sending or receiving signals. You can use this to prevent interruptions by incoming calls or mail when you are shooting photos or movies or playing music, etc.

Open/Close Lock

Whenever you close the A5523T it automatically locks itself to prevent other people from using it to access EZweb or make calls, etc.

Extra Large Icons

When you set the A5523T to Simple Mode, this feature displays the battery level and signal strength icons at a larger size.

E-mail Voice Read

This function enables the A5523T to automatically read out e-mail messages that you receive (requires the EZapps "EZ Mail for a sound and read").

Dictionary

A "Dictionary" electronic dictionary package is built into the A5523T. Dictionary is made up of *Japanese Dict*, *Eng → Jpn Dict*, *Jpn → Eng Dict* and *Katakana word Dict* and contains a total of roughly 159 thousand entries.

Barcode Reader & Maker

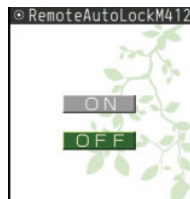
You can use the camera in the A5523T to scan bar codes. This feature will also create bar codes that contain profiles and address book entries.

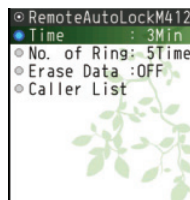
In Case You Lose Your A5523T

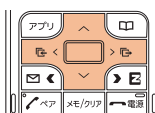
If you set the Remote Auto Lock to *ON* in advance, you will be able to remotely enable the auto lock on the A5523T to prevent others from using your cell phone.

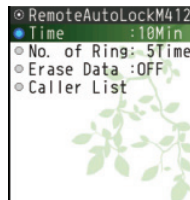
Setting Conditions for Enabling the Remote Auto Lock

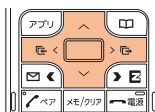
You can enable the auto lock if you call your A5523T repeatedly from a registered phone number within a pre-specified period of time.

1 **When the standby screen is displayed, press [●] [4] [1] [2], enter a Lock No., and then press [●] (OK).**


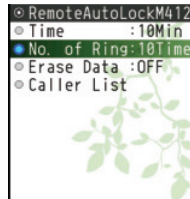
2 **Use [✥] to select *ON* and then press [●] (OK).**


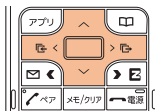


3 **Use [✥] to select *Time*, press [●] (Select), enter a time, and then press [●] (OK).**


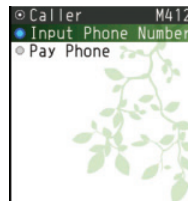


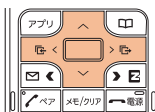
- This sets the time limit for receiving the number of calls set for *No. of Ring* after the first call is received.
- You can set the time in minutes from 01 to 10 (two digits).

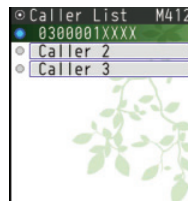
4 **Use [✥] to select *No. of Ring*, press [●] (Select), enter the number of calls, and then press [●] (OK).**


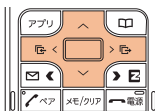


- This sets the number of calls to receive to enable the Remote Auto Lock.
- You can set the number of calls from 03 to 10 (two digits).

5 Use [key] to select *Caller List*, press [key] (Select), use [key] to select one of Caller 1 to Caller 3, and then press [key] (Edit).




6 Use [key] to select *Input Phone Number*, press [key] (Select), enter a phone number, and then press [key] (OK).




7 Press [アプリ] (Back) and then press [アプリ] (Add).

Remotely Enabling the Auto Lock on Your A5523T
1 **Call the A5523T from a registered phone number repeatedly within the time limit set in "Setting Conditions for Enabling the Remote Auto Lock."**

- When your A5523T receives the number of calls specified in *No. of Ring* within the time specified in *Time*, Remote Auto Lock is activated and a message is played notifying you that the cell phone is locked.
Note

- The Remote Auto Lock cannot be enabled when the A5523T is turned off or out of the service area, or Emission OFF is set to *ON*.

Troubleshooting

Symptom	Check	Measure	Reference Page
Cannot turn on power.	●Is the battery pack charged?	Charge the battery pack.	13
	●Did you hold down for at least one second?	Hold down for at least one second.	16
Cannot make calls.	●Is power turned on?	Hold down for at least one second.	16
	●Is (out of range indicator) displayed?	Move to a location where (out of range indicator) is no longer displayed, and try again.	16
	●Is your hand or a metal object covering the area around the built-in antenna?	Make sure your fingers or any other part of your hand or a metal object is not touching or covering the area around the built-in antenna.	11
	●Did you enter the phone number starting with the area code?	When making a call to a phone other than a cell phone, you need to enter the area code first even if you are inside the same area.	29
	●Is Emission OFF set?	Cancel Emission OFF.	—
Cannot receive calls.	●Is (out of range indicator) displayed?	Move to a location where (out of range indicator) is no longer displayed.	16
	●Is power turned on?	Hold down for at least one second.	16
	●Is Emission OFF set?	Cancel Emission OFF.	—
No response when a key is pressed.	●Is power turned on?	Hold down for at least one second.	16
No response when a side key is pressed.	●Is displayed on the main display or is displayed on the sub-display?	Press for at least one second to unlock the side keys.	20
A warning tone sounds and power turns off.	●Is there enough power left in the battery pack?	Charge the battery pack.	13
Calls are answered automatically.	●Is voice memo turned on?	Hold down for at least one second to turn off voice memo.	34
Cannot hear the other party.	●Is the earpiece volume level too low?	During a call, press to increase the earpiece volume.	39
When making a call, a beeping sound is heard from the earpiece and a connection cannot be established.	●Is (out of range indicator) displayed? Or are you in a location where the signal is too weak?	Move to a location where (out of range indicator) is no longer displayed.	16
	●Is the wireless line congested or is the phone you are calling busy?	End the call and try again later.	29
The incoming LED flashes but the ring tone does not play.	●Is manner mode turned on?	Hold down for at least one second to turn off manner mode.	33
	●Is (silent indicator) displayed on the standby screen?	Increase the volume of the incoming call ring tone.	38

Symptom	Check	Measure	Reference Page
Cannot charge the battery pack.	●Is the cell phone inserted in the desktop holder properly? ●Are the plug and connector of the common AC adapter 01 (sold separately) inserted properly?	Insert the cell phone in the desktop holder properly. Check that the AC adapter connector is properly inserted and that the adapter is plugged into the AC outlet securely.	13
When the camera function is started, no subject is displayed.	●Is a finger or other object covering the camera (lens)?	Confirm the position of the camera (lens).	70
